IDENTIFIERS	*Texas

ABSTRACT

This annual statistical report provides a general overview of information related to Texas public schools for the 1989-90 school year. The document begins with "Statistical Highlights," which examines state-level data and discusses the major areas of administrative units, students, staff, and finance for the current year and for comparison with some previous years. The "Detailed Statistics" section provides extensive school district level information on the same major areas discussed in the opening "Highlights" section. Information is displayed in three parts: (1) 91 data items categorized by size, rural versus urban classification, property wealth per pupil, tax effort, and Education Service Center region; (2) tables showing the value of each data item at various percentiles of school districts (distribution statistics); and (3) values for all data items listed for each school district, followed by a state summary. There are 210 pages of tables in the district information. Three appendices contain data sources, notes for clarification, and a listing of Texas school districts in alphabetical order. Twenty-eight exhibits are provided. (SLD)

April 1991

The third edition of ***Snapshot*** comes at a time when a great deal of emphasis is being placed on education by the state's political leadership. Education continues to dominate policy discussions at all levels of government. Recently, as ***Snapshot*** goes to press, the legislature has passed new laws addressing issues of quality and equality in financing Texas public schools.

The information contained in ***Snapshot '90*** represents a significant expansion of presentations in previous years. The *Statistical Highlights* section has been updated to address several important issues in greater detail, and the *District Detail* section has grown from 69 to 91 data items. Included in the expansion are new items for college admissions tests, dropout rates, student enrollment by type of program, teachers by ethnicity, and additional financial revenue information.

I believe ***Snapshot '90*** will serve as an excellent reference for all who are concerned about the quality and accountability of our system of public education.

Sincerely,

Thomas E. Anderson

Thomas E. Anderson, Jr.
Interim Commissioner of Education

ACKNOWLEDGMENTS

This document was prepared by the Texas Education Agency Division of Resource Planning in an effort to provide the public with information about the characteristics of the state's public schools. While this report was prepared by the Division of Resource Planning, it would not have been possible without the assistance of many other Texas Education Agency staff. We sincerely appreciate the assistance of Maureen Moore Scheevel, Editor of ***Research Briefs***. Articles appearing in ***Research Briefs*** during the last year provided much of the information and analysis appearing in the *Statistical Highlights* section of this publication. Also, the continued support of the division of PEIMS is greatly appreciated. Efforts by PEIMS to improve data quality and facilitate access to information were critical to the successful completion of this project. We would also like to recognize the staff of the Resource Center for publishing the document and assisting with the cover design.

The Texas Education Agency also appreciates the efforts of the many local school district and Regional Education Service Center officials who report the vast majority of the information presented in this document .

Introduction

Snapshot '90: 1989-90 School District Profiles, presents a general overview of information related to Texas public schools for the 1989-90 school year. The Texas Education Agency (TEA) considers the publication of this annual statistical report to be a step toward greater accountability at both the state and school district levels as it will make available a wide variety of data in a consistent format from year to year.

This publication will be helpful to anyone interested in learning more about public education in Texas, whether they are concerned citizens, educators, legislators, or research organizations.

Document Organization

This document begins with an examination of state level data and concludes with detailed information about each school district.

The state level, or *Statistical Highlights* section, discusses the major areas of administrative units, students, staff, and finance, and covers both the current year and historical trends. Graphic illustrations are included in this section.

The *Detailed Statistics* section provides extensive school district level information on the same major areas discussed in the *Highlights* section. The *Detailed Statistics* section contains three parts.

First, 91 data items are summarized for groups of school districts categorized by size, by a rural versus urban classification, by property wealth per pupil, by tax effort, and by Education Service Center region.

Second, the distribution of these items is presented in tables showing the value of each data item at various percentiles of school districts. The highest, lowest, and median values for each data item are shown in addition to values at the 5th, 10th, 25th, 75th, 90th, and 95th percentiles. This section is labelled *Distribution Statistics*.

Third, values for all data items are listed for each school district, followed by a state summary. This section, labelled *District Detail*, is in county name order with districts arranged alphabetically within county.

Definitions of the 91 data items follow the *District Detail*. The definitions are in numerical sequence by the number of the item.

Snapshot concludes with three appendices. The first, *Data Sources*, lists the sources of data in alphabetical order by the abbreviations used throughout the document. Each major source of data is described and accompanied by a listing of associated data items.

End Notes, the second appendix, is intended to clarify terms that are not thoroughly addressed in other parts of the document.

The third appendix, *District Listing*, contains a listing of school districts in alphabetical order by name, with Education Service Center (ESC) and State Board of Education (SBOE) assignments as well as each district's county district number. This listing will help readers locate a particular district in the *District Detail* section by relating the district name to the appropriate county.

Overview of Data Sources

The vast majority of data in this document is reported to the TEA by school districts. The 1989 fall data collection for the Public Education Information Management System (PEIMS) and the 1989 *Fall Survey of Students in Membership* are the primary sources of data. Information obtained from the State Property Tax Board (SPTB) for the 1989 calendar year is also used.

This edition marks a significant increase in the number of items presented in the *District Detail*. The increase requires an additional two pages for each district, bringing to six the total number of pages per district. A new set of districts is presented every sixth page. The new items are important in presenting a complete picture of Texas public schools. Exhibit B in *End Notes* provides a crosswalk between the items in this edition and those of previous editions.

While there is some analysis of state and group level data in the *Highlights* section, the district information is descriptive only. Readers should use discretion in drawing conclusions from the data presented.

Statistical Highlights

AGENCIES OF PUBLIC EDUCATION

Central Education Agency

The Central Education Agency, composed of the State Board of Education (SBOE) and the TEA, guides and monitors public education in this state.

The SBOE provides leadership and state level administration for Texas public education. The commissioner of education and the TEA staff work closely with the board to implement education policy.

The SBOE is comprised of 15 elected members representing various regions of the state, one of whom is appointed chair by the Governor. A map of the SBOE district boundaries is included in the *End Notes.*

Voters elected new board members in the fall of 1988, seven with two-year terms and eight with four-year terms. The seven members who were elected in 1988 faced reelection in 1990. Because SBOE district boundaries will be redrawn at the time legislative and congressional districts are redrawn, all board positions will be subject to reelection in 1992 irrespective of the original term of office.

The TEA, located in Austin, Texas, is the administrative unit of the Central Education Agency. Under the management of the commissioner of education, the TEA provides curriculum and technical assistance, accredits school districts, operates research and information programs, monitors for compliance with federal and state guidelines, and serves as a fiscal agent for the distribution of state and federal funds. In 1989-90 approximately 1,000 staff were employed at the TEA.

EXHIBIT 1
Enrollment by Campus Type

Campus Type	Enrollment	# of Campuses	% of Total
High School	846,876	1,052	18%
Junior High School	190,229	296	5%
Middle School	483,410	793	13%
Elementary School	1,740,850	3,357	57%
Elementary & Secondary Combined	46,713	271	5%
Special Education & Other	8,707	119	2%
TOTAL	3,316,785	5,888	100.0%

Typically, junior highs are those campuses offering 7th and 8th grades while middle schools are those offering 6th through 8th grades.

Local School Districts

While the SBOE provides leadership for education, much of the control of public schools remains with the over 1,000 local school districts. Districts may serve students at one or more campuses in grades pre-kindergarten through twelve. There are almost 6,000 public school campuses in Texas, and over half of these serve students in the elementary grades.

Exhibit 1 presents counts and enrollments for all campus types. Campuses are typed ac-

EXHIBIT 2
Number of Districts by Type

District Type	Number of Districts
Regular FSP	1,052
Special Statutory	6
State-Administered	22
TOTAL	1,080

The majority of school districts in Texas have locally elected governance boards and are able to tax property within their boundaries.

cording to the range of grades they offer. *End Notes* provides more information about the grades offered in each of these categories.

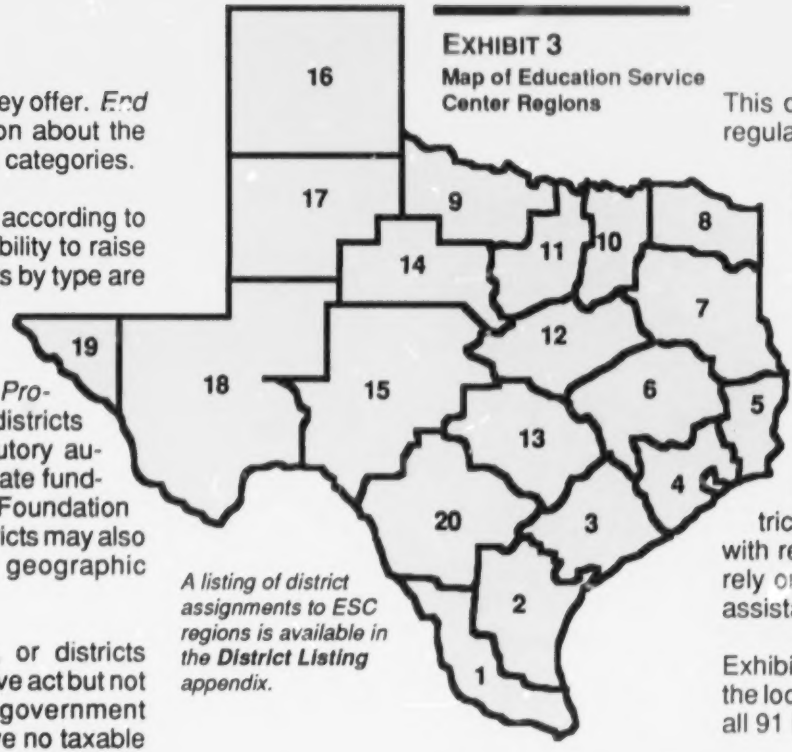
Districts in Texas are classified according to governance structure and the ability to raise local revenue. Counts of districts by type are illustrated in Exhibit 2 and are defined as follows:

1) *Regular Foundation School Program (FSP) Districts*, or districts created under general statutory authority that are eligible for state funding assistance under the Foundation School Program. These districts may also tax property within their geographic boundaries;

2) *Special Statutory Districts*, or districts created by a special legislative act but not administered by a state government agency. These districts have no taxable property. Examples are the public schools associated with military bases in the San Antonio area and the Masonic Home in Fort Worth, and;

3) *State-Administered Districts*, or districts created by legislative act which are both funded and administered by a state government agency. Most are administered by the Texas Department of Mental Health and Mental Retardation or the Texas Youth Council.

EXHIBIT 3
Map of Education Service Center Regions



*A listing of district assignments to ESC regions is available in the **District Listing** appendix.*

This document includes data for the 1,052 regular FSP districts and the six special statutory districts only. State-administered districts do not have the same reporting requirements and are not included.

Regional Education Service Centers

The 20 regional ESCs serve the school districts within defined geographic boundaries. Great disparity exists among the ESCs in terms of the number and characteristics of the districts they serve. Disparity also occurs with respect to the degree to which districts rely on the TEA and the service centers for assistance.

Exhibits 3 and 4 provide information about the locations and sizes of ESCs. Statistics for all 91 items are available summarized to the

EXHIBIT 4
Number of Districts by Education Service Center Region

Region		Number of Districts	Region		Number of Districts	Region		Number of Districts
1	Edinburg	38	8	Mt. Pleasant	48	15	San Angelo	45
2	Corpus Christi	44	9	Wichita Falls	40	16	Amarillo	69
3	Victoria	41	10	Richardson	79	17	Lubbock	61
4	Houston	55	11	Fort Worth	77	18	Midland	33
5	Beaumont	29	12	Waco	78	19	El Paso	13

7	Kilgore	98	14	Abilene	47		Total	1,058

regional level in the *Detailed Statistics* section of this document. Additional information is available in the ***Biennial Report on Education Service Centers*** published by the agency.

The service centers work closely with the districts to provide technical assistance in the areas of accreditation and curriculum, staff development and administrator training, and the implementation of PEIMS. Centers also provide schools with instructional media, data processing services and assistance in program improvement in areas such as bilingual education, gifted and talented education, and programs for at-risk students.

STUDENTS

Student Measures

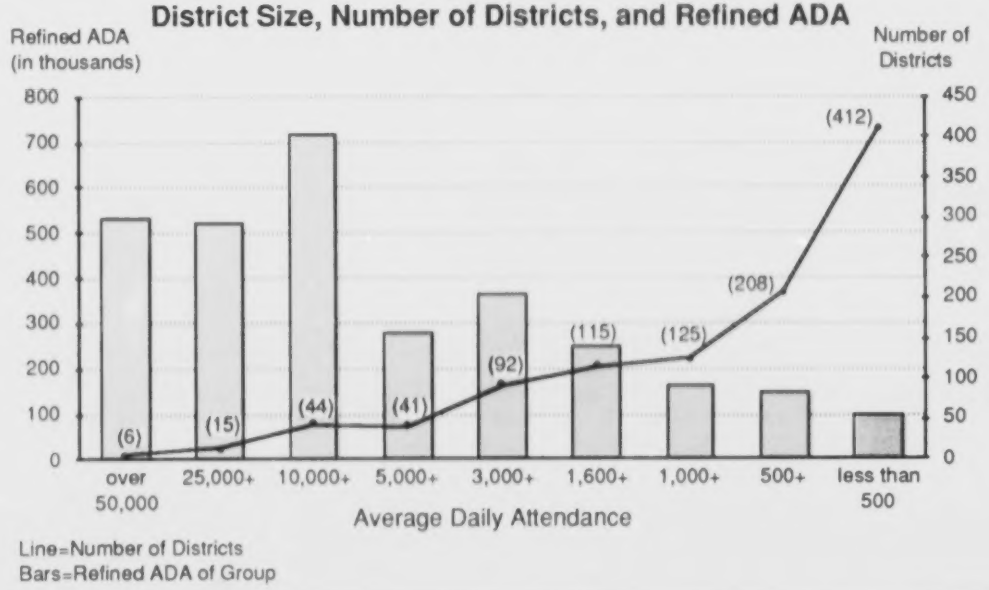
Districts count students several ways. The two types of student counts used in this document are enrollment and refined average daily attendance (ADA).

Enrollment is a count of students taken on a single day in the fall of each school year. Beginning with the 1990-91 school year, this student count will be collected through PEIMS and will be taken in both the fall and spring semesters. Unless otherwise noted, student counts and per pupil amounts presented in this document use enrollment figures.

Refined ADA is a number calculated by the TEA from attendance information reported by districts for four weeks in the fall and four weeks in the spring each year. Refined ADA is the average of the best, or highest, four of the eight reported weeks for each district. This count is the primary student measure used to allocate state funds.

EXHIBIT 5

District Size, Number of Districts, and Refined ADA



District Size

The 1,058 public school districts in Texas range in size from three students in the smallest district to 174,340 in the largest. The half dozen most populous districts in the state account for 17 percent of all students while over 400 of the smallest, those with refined ADA less than 500, serve only 3.2 percent of total students.

Exhibit 5 clarifies the inverse relationship between number of districts in a size range and the number of students they serve. Exhibit 6 showing the refined ADA at selected percentiles of districts also illustrates this skewed distribution.

EXHIBIT 6
Refined Average Daily Attendance of Districts at Selected Percentiles

Percentile	ADA	
100% (Largest)	174,340	Houston ISD
95%	13,720	
90%	5,163	
75%	2,035	
50% (Median)	743	
25%	307	
10%	131	
5%	81	
0% (Smallest)	3	Allamoore ISD

Student Population Growth

During 1989-90, the 1,058 regular and special statutory districts in Texas served over 3.3 million students in grades pre-kindergarten through 12. This total represents a 1.4 percent increase from the prior year, approximately the same rate of increase as was experienced between 1987-88 and 1988-89.

Growth by Ethnicity

Minority students now account for 49.7 percent of the total population. Any growth that has occurred during the past three years is attributable to growth in the minority student populations. In 1989-90 minority students increased by 46,480 while the number of white students declined by 1,204. This is the third consecutive year the number of white students has declined, although the magnitude of the decrease has been diminishing since 1986-87 (-9,687, -3,604, and -1,204 students, respectively.)

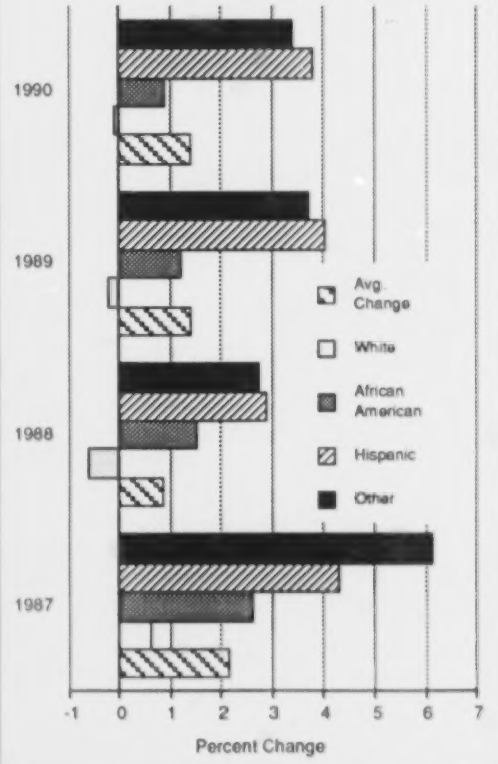
The Hispanic population is increasing at the greatest rate, with a growth rate of 3.8 percent, almost three times the statewide average rate. Hispanic students now account for 33.1 percent of the total population.

Although small in percent of total population (2.1 percent) high growth also occurred in the state's Asian and American Indian populations. These populations show a combined growth rate of 3.4 percent since 1988-89. The African American student population increased by 4,218 students, a less than one percent increase. The African American population now accounts for 15 percent of total students. See Exhibit 7.

Distribution of Growth

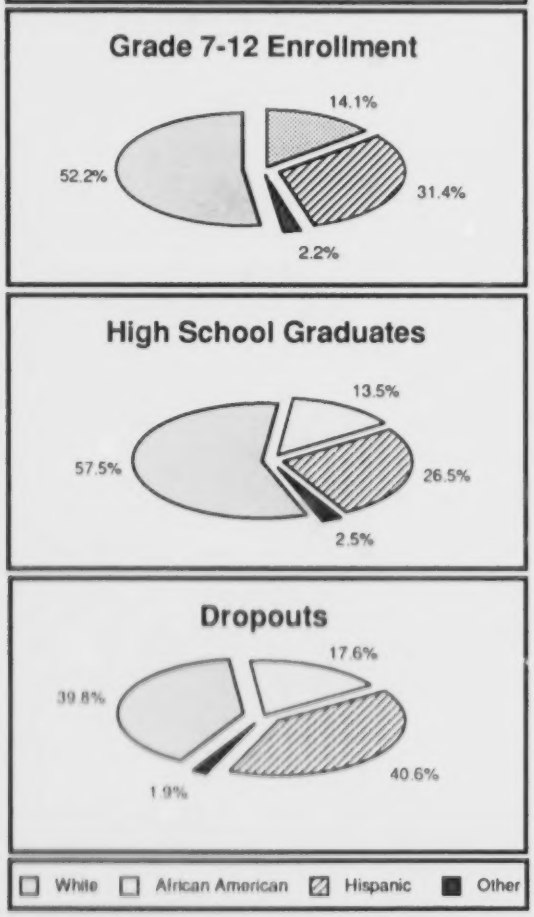
Analysis of growth by county indicates Hispanic students are displacing students of other ethnicities, particularly in the Panhandle and East Texas. Displacement occurs when total growth in an area is small or negative when compared to growth in a sub-population. For example, growth in the Hispanic population increased by more than five percent in over a hundred counties, primarily in the Panhandle and East Texas, while total growth increased by this magnitude in only four of these same counties.

EXHIBIT 7
Year-to-Year Percent Change in Enrollment by Ethnicity 1987 to 1990



Since 1987 the white population has been declining while the Hispanic population has shown the greatest increases. African American students have continued to increase in number, but the rate of growth in this population has declined each year since 1987.

EXHIBIT 8
Student Populations by Ethnicity



Hispanic and African American students make up disproportionately smaller percentages of graduates and larger percentages of dropouts when compared with their percentages in the student population.

Growth by Grade Span

The number of students in grades kindergarten through 6 continues to rise. Growth in these grades and in the pre-kindergarten programs have offset declines in the higher grades. Approximately 56 percent of all students are enrolled in grades kindergarten through 6, however these grades account for 82 percent of the total growth since 1988-89.

Growth greater than the state average occurred in all ethnic groups in these grades, although minority students grew at a rate almost three times that of white students. The percent minority students in these grades is virtually the same as the percent minority overall; 49.9 percent.

In 1989-90, the number of students in grades 9-12 declined by approximately 6,500 students, the second consecutive year in which this population exhibited losses. Analysis of the grades within this span indicate higher counts of 9th and 10th graders compared with last year, but much smaller numbers of 11th and 12th graders. By 1990-91, the 11th and 12th grade classes should exhibit positive rates of growth as the population in the lower grades ages. Also, the membership of these upper grades will be affected as the goals of dropout prevention programs are realized.

Graduates

During 1989-90, 171,858 regular high school students graduated from Texas public schools. White students accounted for 57.5 percent of all graduates, Hispanic students, 26.5 percent, African American students, 13.5 percent, and other students, 2.5 percent. See Exhibit 8.

The total number of graduates in 1989-90 is 5,550 less than in 1988-89. This decrease is most likely related to the smaller 12th grade class that existed in 1989-90. Over 9,000 fewer 12th graders were enrolled in 1989-90 than in the prior year.

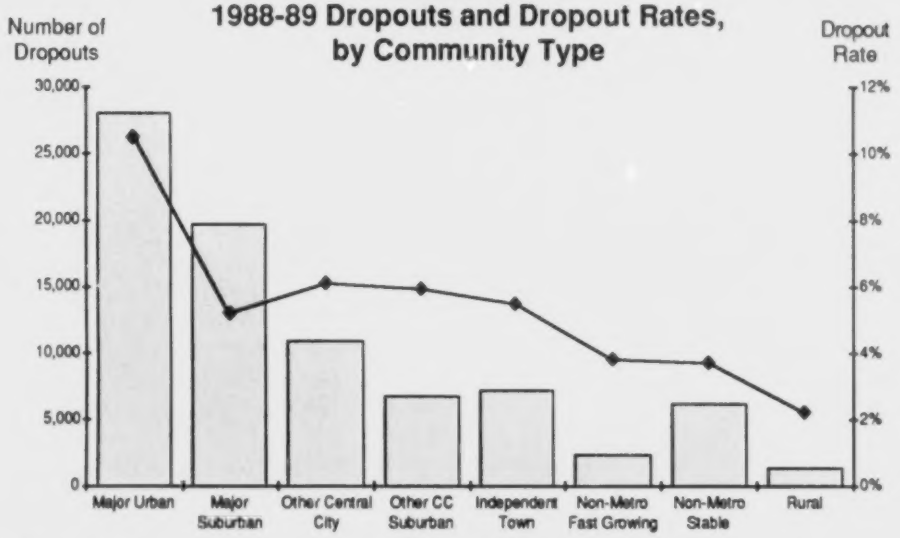
Total graduates were 68.5 percent of all 7th graders enrolled in 1984-85. Although this loss of 79,000 students between the 7th and 12th grades is partially due to outward migration from Texas, a major problem exists with students dropping out.

Dropouts

School districts reported a total of 82,194 dropouts in grades 7 through 12 for the 1988-89 school year, representing a statewide dropout rate of 6.1 percent. Urban districts and districts with high percentages of minority students exhibit the highest dropout rates. Exhibit 9 depicts the relationship between community type and dropout rates.

A student who dropped out typically was male (55 percent), although there is some variation in the distribution by sex within grade level. Of the total, almost 64 percent dropped out during the regular school year as opposed to over the summer. The largest percentage of

EXHIBIT 9
1988-89 Dropouts and Dropout Rates, by Community Type



dropouts left school in the 9th and 10th grades (29 percent and 22 percent, respectively). It is estimated based on the students' birth dates that 69 percent of dropouts were at least one grade level behind in school.

Among the Asian population of 7th through 12th graders, 4.4 percent dropped out. For white students that figure was 4.5 percent; for African Americans, 7.5 percent; for Hispanics, 8.1 percent; and for American Indians, 16.5 percent. Refer to Exhibit 8 for a breakdown of the ethnicities of the total 7th through 12th grade student population compared with graduates and dropouts.

Both the number of dropouts and the dropout rate tend to be higher in the urban districts. The highest rate, 10.5 percent, occurs in the eight districts classified as major urban.

STUDENT PERFORMANCE

Texas Educational Assessment of Minimum Skills

The 1989-90 school year marked the fifth and final year of the Texas Educational Assessment of Minimum Skills (TEAMS) testing program. The Texas Assessment of Academic Skills (TAAS) program succeeded TEAMS as the statewide assessment program in October of the 1990-91 school year.

TEAMS, a criterion-referenced test, was defined and mandated as part of the 1984 reform legislation aimed at improving performance and accountability in Texas schools. A criterion-referenced test relates test items to specific learning objectives. In the case of Texas, those objectives are based on the essential elements. The essential elements consist of those areas of study identified by the State Board of Education as comprising a well-balanced curriculum. The basic areas covered by the essential elements are En-

EXHIBIT 10
Percent of Students Passing TEAMS by Grade and Subject

Grade	# Students Tested	% Passing All Tests Taken	% Passing Math	% Passing Reading	% Passing Writing
3rd - Spanish	6,315	78.5%	84.1%	89.5%	88.7%
3rd - English	232,885	71.7%	92.3%	85.8%	78.7%
5th	222,450	76.6%	90.9%	87.9%	84.3%
7th	219,873	79.8%	92.4%	90.0%	86.9%
9th	223,903	64.1%	87.3%	83.8%	71.7%
11th	177,479	78.0%	80.9%	90.6%	N/A
TOTAL	1,082,905	73.8%	89.1%	87.5%	80.4%

Grade 11 language arts results are presented in the "% Passing Reading" column. All counts of special education students and their scores have been excluded from the results for all grades. Scores in this exhibit for grades 3 through 9 are from the February 1990 administration of the test. Grade 11 scores are from the October 1989 administration.

glish, foreign language, mathematics, science, health, physical education, fine arts, social studies, business and economics, vocational education, and history. The TEAMS test assessed students in grades 3, 5, 7, and 9 for minimum competency in the areas of mathematics, reading, and writing.

The grade 11 test, called an exit level test because students must master it in order to graduate, tests the areas of language arts and mathematics. Students failing to pass the subject areas tested in grade 11 are tested again in grade 12. In 1989-90, 3,629 seniors failed to pass the May 1990 administration of the examination and were therefore ineligible to receive a high school diploma.

Various measurements can be used to interpret test results but the measurement reported in this document is the percent of students passing the test taken. The percent passing is variously shown as the percent passing each subject for each grade, as the percent passing all tests taken for a specific grade, as the percent passing all tests taken for a specific ethnic group, or as the district passing rate for all subjects and all grades.

As shown in Exhibit 10, among the grades tested, the percent passing all tests taken is lowest in the ninth grade, with 64.1 percent passing. Of the three subject areas, fewer students pass writing than reading or math in all grades except third grade students tested in Spanish. Eleventh grade students perform significantly better in language arts than in mathematics. Districts must offer remediation to students failing any portion of the TEAMS test. In grades 3 through 9, almost 275,000 students, or approximately 28 percent, will require some remediation.

Group information in the *Detailed Statistics* section shows that TEAMS scores tend to be higher in wealthy districts and lower in large, urban districts. The three volume TEA publication ***Texas Educational Assessment of Minimum Skills: Student Performance Results for 1989-90*** is available for more information.

College Admissions Tests

Analysis of results from college admission tests administered to high school seniors graduating at the end of the 1988-89 school year reveal that over 72,000 (40 percent) took the Scholastic Aptitude Test (SAT) and over 48,500 (27 percent) took the ACT component of the American College Testing Program.

The SAT tests verbal and mathematics skills, whereas the ACT tests social studies and natural sciences in addition to English and mathematics. A perfect score on the SAT is 1,600 and on the ACT is 35.

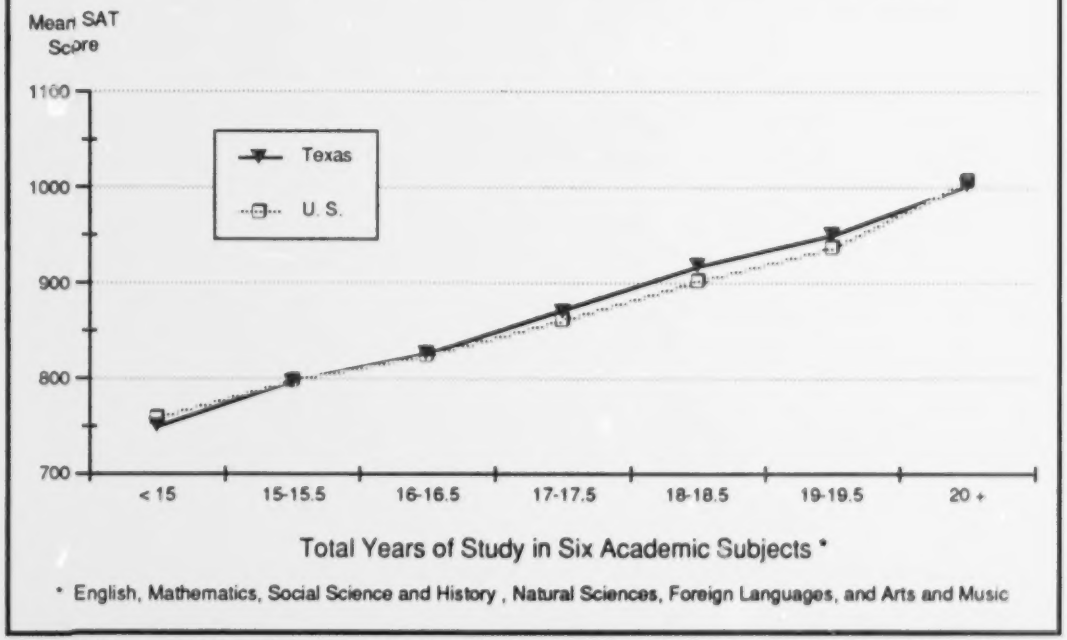
The average Texas SAT score is 876, or 414 verbal and 462 mathematics, which falls below the national average of 903 (427 verbal and 476 mathematics). The average composite score on the ACT in Texas is 17.4, compared to a national average ACT composite of 18.6.

Students taking the SAT self-reported information on academic preparedness, and parental education and income. As the number of academic courses taken increases, as parental education, or as parental income increases, SAT scores increase. Exhibit 11 shows the relationship between years of study in academic subjects and total SAT scores.

Patterns are also evident when the characteristics of school districts are compared with ACT and SAT scores. In general, the wealthier the district, the greater the expenditures per pupil, and the lower the percentage of students classified as low income, the higher the scores.

EXHIBIT 11

SAT Scores for 1988-89 Seniors by Years of Academic Study



For both Texas and the nation, test scores rise with academic preparedness. Given comparative levels of preparation, Texas scores equal or slightly exceed the national totals. Since the mean SAT scores for Texas are lower than those of the nation, this means students in Texas take fewer years of academic units on average than do students nationwide.

There is a strong negative correlation between test scores and the percent of students taking the test. A small percent of the population tested usually indicates participation of only the most academically prepared, resulting in higher scores. Of interest however, is that in Texas as the wealth of the district increases, the scores *and* the percent of students tested both rise.

In Texas, greater percentages of graduates take the SAT in more urban districts while greater percentages of graduates in rural districts take the ACT. On both SAT and ACT tests, males scored higher on average than females, and white and Asian students scored above other ethnic groups.

DISTRICT STAFF

School district staff include professionals, educational aides, and auxiliary staff. Professional staff are teachers, central and campus administrators, and professional support staff such as supervisors, counselors, and librarians. Professional staff full-time equivalents (FTEs) increased 2.3 percent and average base salaries increased 4.4 percent for professionals since the fall of the 1988-89 school year.

Staff Counts

As illustrated in Exhibit 12, teachers, 84 percent of professional staff and 52 percent of all staff, comprise the largest single category of staff. However, among professionals, teacher FTEs showed the smallest percent increase from last year, only 1.9 percent. This rate of growth is 36 percent higher than the 1.4 percent increase exhibited in the student population.

EXHIBIT 12
District Staff by Category

Category	FTEs	Percent of Total	Average Salary Base Pay Only	Average Salary (Including Supplements
Teachers	200,179	52.2%	$25,923	$27,496
Campus Administrators	10,306	2.7%	$40,366	$40,649
Central Administrators	7,145	1.9%	$43,966	$44,159
Professional Support	20,276	5.3%	$30,727	$30,945
TOTAL PROFESSIONALS	237,906	62.1%	$27,500	$28,862
Educational Aides	29,904	7.8%	$10,008	$10,038
Auxiliary Staff	115,539	30.1%	$11,925	$11,925
TOTAL STAFF	383,349	100.0%	$21,441	$22,288

See Exhibit C in the ***End Notes*** *for a list of positions assigned to each of these categories. Supplements are amounts paid in addition to an employee's base salary and include such things as career ladder, athletics, club sponsorships, and band or orchestra.*

Among professionals, support staff showed the most growth, 6.9 percent, followed by administrators with an increase of 2.8 percent. Support staff and administrators each account for approximately 5.0 percent of all employees. Counts of educational aides decreased by 2.2 percent, while auxiliary staff, the second largest single group at 30 percent, grew by 3.9 percent. Auxiliary staff include bus drivers, maintenance workers, and cafeteria workers.

With respect to professional staff, greater rates of growth occurred in larger districts. See Exhibit 13. Smaller districts tended to show decreases in non-teaching staff (professional support and administrators). Growth in the teacher population occurred in all but the largest districts, those with refined ADA greater than 50,000, and the smallest, those with refined ADA under 500.

Approximately 34 percent of all staff employed in Texas public schools are minorities: 21 percent Hispanic, 12 percent African American, and 1 percent Asian American and American Indian. Among teachers, minorities account for 22 percent.

Teacher Experience and Education

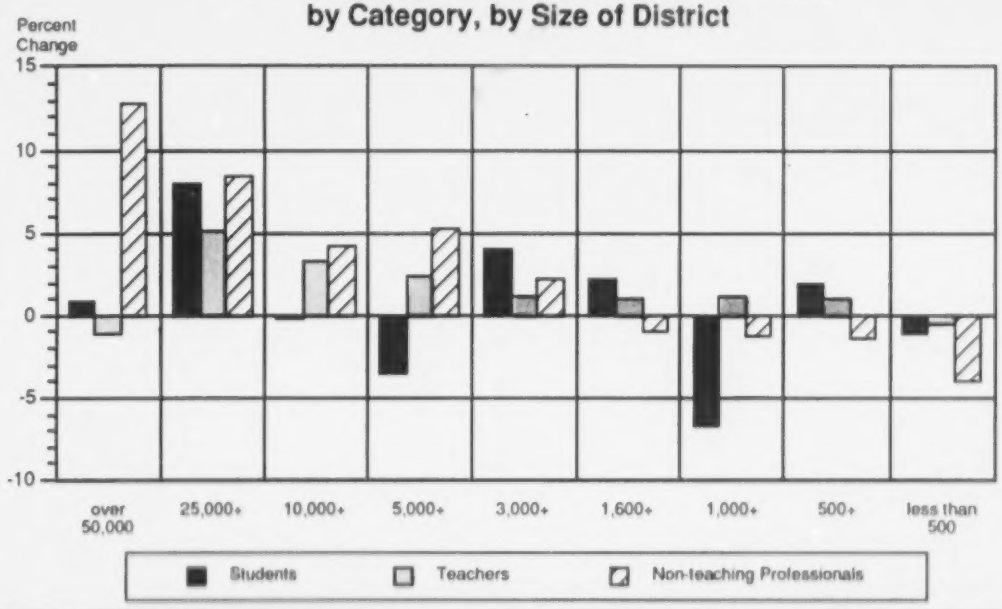
Most Texas teachers, 67 percent, possess a bachelor's degree as their highest degree held. An additional 32 percent have earned master's or doctorate degrees. Approximately 0.9 percent, primarily vocational education teachers, are reported as having no degree. See Exhibit 14.

The average teacher in 1989-90 has 11.3 years of total teaching experience. Tenure, or longevity within a particular district, averages 7.6 years. These averages have varied only slightly over the past few years.

Permits

Teachers, counselors, principals, and certain administrators must either have earned the appropriate certification or be granted one of five types of permits in order to perform their duties. For a non-certified person to teach,

EXHIBIT 13
One Year Change in Professional Staff Counts by Category, by Size of District



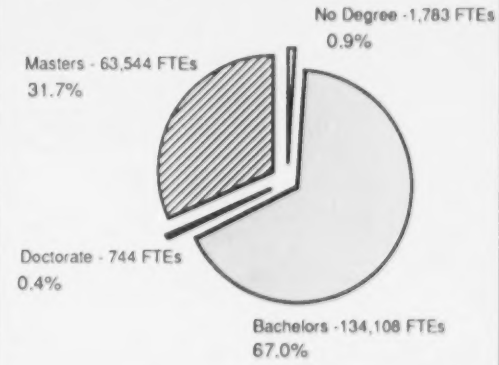
Non-teaching professionals include professional support staff and campus and central administrators. Non-teaching professionals decreased between 1988-89 and 1989-90 in the four categories of districts with fewer than 3,000 students in refined ADA, while non-teaching professionals increased between 2 to 13 percent in the categories of districts with over 3,000 students.

for a teacher to undertake counseling or administrative duties, or for a teacher to teach out of field, a permit must be acquired.

The TEA must authorize the nonrenewable permit, emergency teaching permit (ETP), special assignment permit (SAP), and vocational permit. A district superintendent may authorize the temporary classroom assignment permit (TCAP) for a teacher to teach more than one class out of field.

Item 49 presented in the *Detailed Statistics* section shows that statewide 4.2 percent of teachers hold an active permit of some type, approximately the same percent indicated in 1988-89.

EXHIBIT 14
Highest Degree Held for Teachers



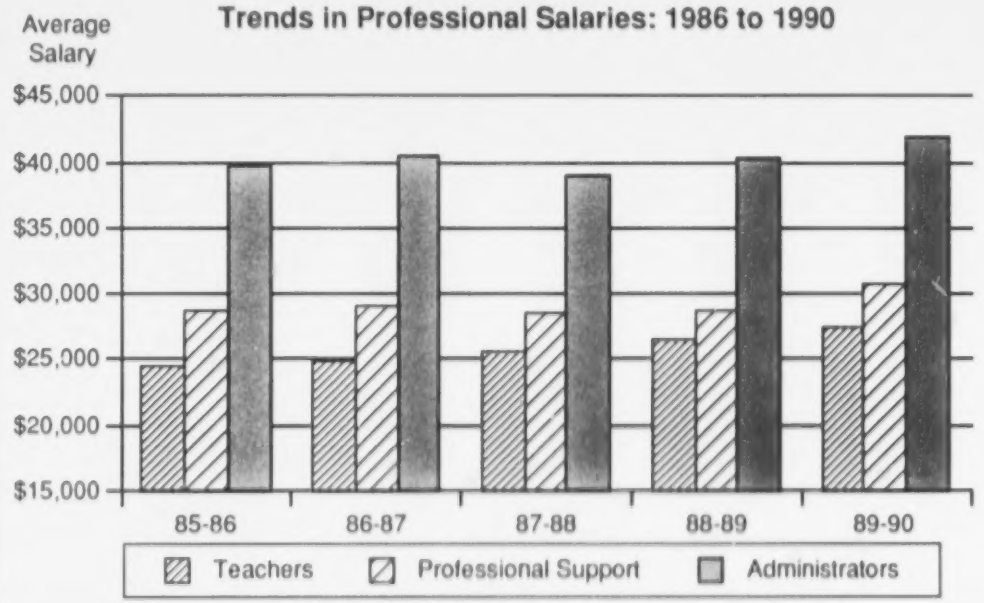
One-third of Texas teachers hold a master's degree or higher.

Professional Salaries

Professional base salaries grew 4.4 percent since the fall of the 1988-89 school year to $27,500. Total salaries, including reported supplements, climbed to $28,862, a 3.9 percent increase. Supplements are amounts paid in addition to the base salary contracted for an employee's regular duties. Supplements are paid for such things as career ladder, athletics, club sponsorships, and band or orchestra.

The larger percent increase in base salaries is at least partially attributable to increases in the minimum salary schedule mandated by the legislature in 1989. The new mandates raised the minimum beginning salary of a

EXHIBIT 15
Trends in Professional Salaries: 1986 to 1990



Salaries reflect base pay only for professional support and administrative staff. Teacher salaries include career ladder supplements for all years shown.

professional from $15,200 to $17,000 beginning with the 1989-90 school year.

Teacher total salaries increased by 3.65 percent, to $27,496. On average, support staff earn $30,945, central administrators, $44,159, and campus administrators $40,649. Support staff exhibited the greatest percent increase, 5.0 percent, followed by administrative total salaries with a 4.1 percent increase.

Exhibit 15 depicts trends in professional salaries since 1986.

Analysis of salary increases by size and type of district indicate the greatest increases occurred in small, rural districts. One explanation is that smaller districts were forced to increase salaries in order to meet the higher minimums, whereas the larger districts were already paying well above these levels.

For example, the six largest districts pay teachers $27,142 in base salary on average, while the smallest districts average only $24,018. However, increases in average base salaries were 6.2 percent in the smallest districts and only 2.8 percent in the largest.

Teacher Career Ladder

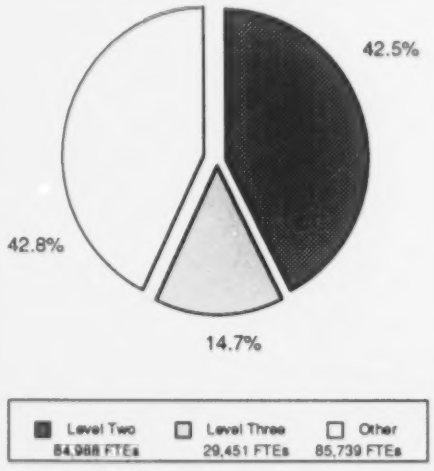
A career ladder for teachers was mandated by the legislature in 1984 and first implemented in the 1984-85 school year. The system was initiated to reward excellence in the teaching field and to attract talented students to the teaching profession by raising the compensation level.

The career ladder has four levels; however as of the 1989-90 school year only levels one, two, and three have been implemented. Placement decisions are made by the employing district and are based on job performance, education, and years of experience.

Teachers meeting specified performance standards and placed on levels two or above are eligible to receive salary supplements. State law establishes the range for these supplements and the state allots each district money for the career ladder on a per student basis. In 1989-90 districts received $90 for each student in refined ADA to be used to supplement the salary of each teacher above level one.

In 1989-90 the ranges for supplement amounts for teachers on level two were $1,500 to $2,000; and for teachers on level three, $3,000 to $4,000. Estimates of the average supplement amounts paid in this year are $1,620 and $3,161 for levels two and three, respectively. These estimates are based on the total supplement amounts reported for teachers placed on levels two or three. Districts report supplement amounts for only about 35 percent of the teachers identified as being on levels two or three. See Exhibit 16.

EXHIBIT 16
Teachers on the Career Ladder



Data from the fall of 1989 indicate that more than 57 percent of teachers receive recognition and salary supplements through the career ladder.

FINANCES

Financial information in this document represents district budgeted amounts as of October 1989. Audited financial information is reported for similar items but is generally available a year later than are budgeted data.

Texas public school districts use a uniform accounting system to record revenues and expenditures. Revenues are recorded by fund and object; expenditures by fund, function, and object. Additionally, expenditures relating to instruction must be accounted for by program. Examples of programs are the regular, special, vocational, and bilingual education program.

COOPERATIVES

Some districts participate in cooperative arrangements with other districts. The fiscal agent, or manager of the cooperative may be another district, an ESC, or a county.

One of the most common types of cooperatives is a special education cooperative, where special education services are shared among member districts. An indicator is shown in the *District Detail* for each district that participates in, or is a fiscal agent of, a special education cooperative.

These districts may have per pupil amounts which differ from expectations because students served through the fiscal agent are not necessarily enrolled in the fiscal agent district. To correct for this problem, any amounts budgeted in fund group 80, fiduciary fund types, have been excluded from the figures shown in this document. Total revenues and expenditures reported in fund group 80 are approximately $70.5 million and $86.9 million, respectively.

Another case where per pupil expenditures may be misleading occurs when districts pay tuition to another district for pupils they do not serve. A characteristic some of these districts share is that they do not have a high school (see item 3 in the *District Detail*) indicating fewer than 12 grades are offered. Expenditures budgeted for tuition transfers have been excluded from the financial information presented in this edition of ***Snapshot***. See the *End Notes* for further details.

REVENUES

School districts receive operating funds from three major sources: local, state, and federal. In 1989-90, the total amount of revenues budgeted by local school districts was $12.7

billion, not including revenue raised for capital construction through the issuance of debt. This represents an increase of 7.4 percent over 1988-89.

Local funds comprise 52.8 percent of total revenues. The vast majority of local funds, 89 percent, are from local property taxes. State revenues comprise 40.2 percent of all revenues, while federal revenues account for the rest. See Exhibit 17.

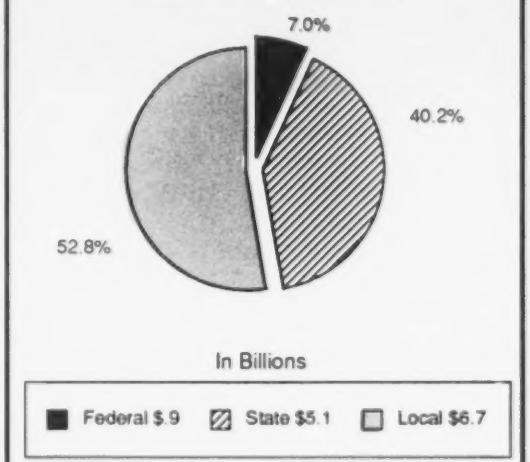
The portion of school district budgets made up of local revenues has been rising steadily since 1984-85. That year, and that year only, gains in state revenues exceeded gains in local revenues due to additional state funds from House Bill 72. Since 1984-85 when local revenues accounted for 48 percent of the pie, the local portion has grown to almost 53 percent. The state portion has declined to 40 percent from a high of 46 percent in 1984-85.

In any single district, the composition and level of revenue sources may vary substantially from the state average depending upon local wealth and qualifications for federal assistance.

Local Funds

Local funds for public education are raised primarily through the local property tax. Taxes are levied against locally assessed property rolls to generate revenue. All tax rates shown in this publication are effective tax rates, calculated using the market value of property estimates from the State Property Tax Board (SPTB). Locally adopted rates are not used for inter-district comparisons because they do not control for variation in local appraisal practices.

EXHIBIT 17
Revenue by Source



1989-90 district budgeted revenue from all funds except the capital outlay fund is apportioned by source. Debt service funds are almost entirely generated from local sources, which has an impact on this distribution.

Districts set two tax rates each year, one for maintenance and operations (M&O) and another for debt service, called the interest and sinking fund rate (I&S). M&O tax rates are subject to a statutory maximum of $1.50 per $100 assessed valuation. If the amount of taxes levied in a given year exceeds the preceding year's levy by eight percent, voters may petition for a tax roll back election. I&S tax rates are not subject to the same limitations as those for current operations.

Increases in local tax effort have been dramatic during the 1980's. The total effective tax rate has risen from $0.56 per $100 valuation in 1983-84 to $0.96 in 1989-90, a 71 percent increase in six years. See Exhibit 18. Almost half the districts in the state now have locally adopted rates over $1.00, compared with only 42 districts (3.9 percent) with rates of this magnitude six years ago.

Factors contributing to increased local effort include falling property values, an increasing student population, and incentives in recent legislation for districts to boost their effort in order to receive state equalizing funds.

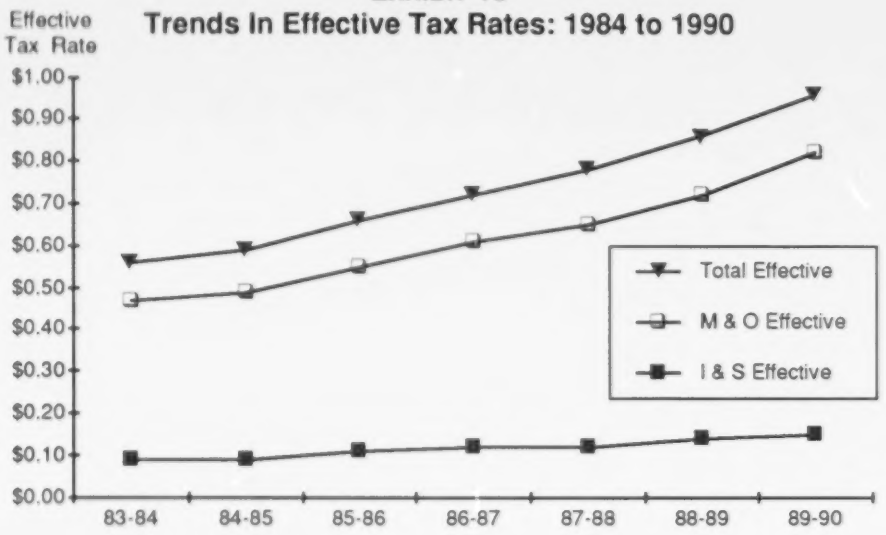
Property values in 1989-90 were $631 billion, $70 billion less than they were at their peak in 1985-86. Given falling property values, districts must tax at higher rates in order to generate the same levy amount as in prior years. This, coupled with more students to serve, means districts must tax even higher to generate the same levy amounts per pupil.

State Funds

State funds for public education in Texas are distributed through a system of formulas known as the Foundation School Program (FSP). The FSP is a financing system made up of a series of allotments designed to en-

EXHIBIT 18

Trends In Effective Tax Rates: 1984 to 1990



School district tax rates have increased dramatically since 1983-84, driven by falling property values, a growing student population, and in recent years, by legislative incentives for districts to raise their tax effort to receive state equalizing funds.

sure that each school district can provide instructional programs suitable to meet the minimum educational needs of its students.

Allotments are calculated using various student counts while the actual payment of state funds is based primarily on the property tax base of the school district. Historically, the tax effort of the school district has been less important in determining the level of state aid a district received.

In 1989, the Foundation School Program underwent significant revision during the 71st session of the Texas Legislature in response to the Edgewood v. Kirby court case. The changes made as a result of Senate Bill 1019, 71st Legislature, Regular Session, were implemented with the 1989-90 school year. Additional changes have been made to the Foundation School Program for the 1990-91 and 1991-92 school years in more recent legislation.

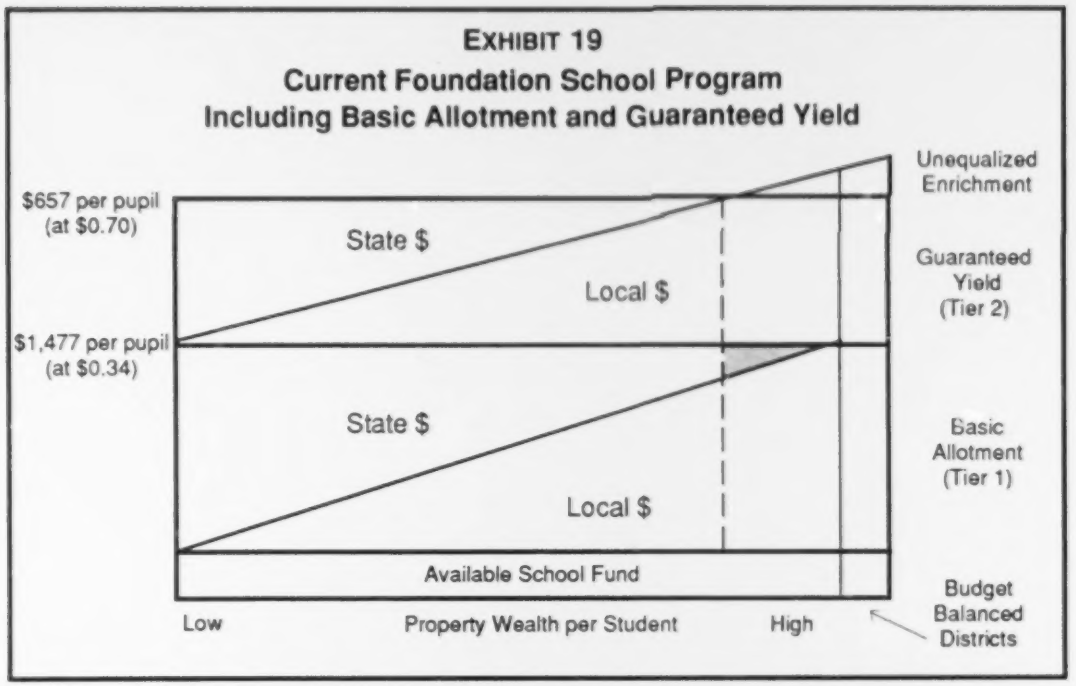
With the start of the 1989-90 school year, the basic allotment, or the base amount provided by the state for each pupil in refined ADA, was increased from $1,350 to $1,477. In the past, a district was entitled to its basic allotment regardless of whether or not the district raised its share of the FSP, called the local fund assignment (LFA). However, in order to qualify for state aid in the 1989-90 school year, districts had to raise their LFA by taxing at a minimum rate of $0.34 per $100 valuation.

A few wealthy districts, representing approximately two percent of the state's students, receive no state aid and are therefore not required to raise their LFA. These districts, known as budget balanced districts, receive only the constitutionally provided Available School Fund allotment for their students.

In addition to changes in the basic allotment, a guaranteed yield program began in 1989-90 to provide additional funds to districts. This level of financing, often referred to as the second tier, enables low wealth districts to earn additional state funds by setting their tax rate above the LFA level.

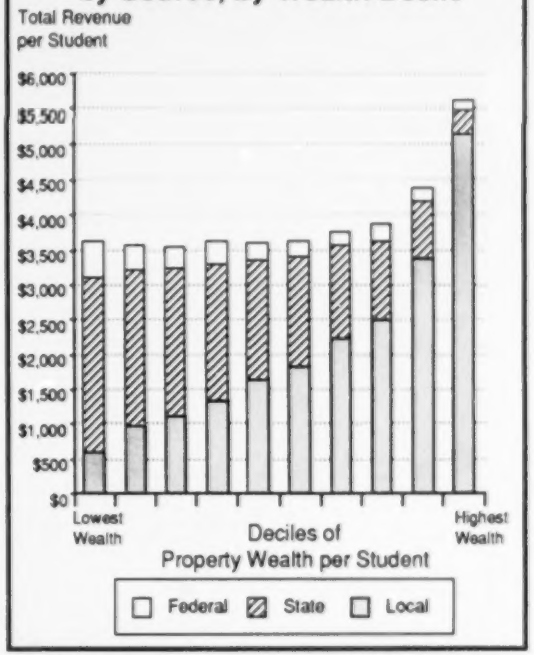
For each penny of tax effort the district levies above the LFA requirement, up to an additional $0.36 (for a total tax rate of $0.70) the state will guarantee a yield of $18.25 per penny, per student. The maximum guaranteed yield amount for 1989-90 is $657 per student. The effect of a guaranteed yield program is to increase the tax base available to property poor school districts.

EXHIBIT 19
Current Foundation School Program Including Basic Allotment and Guaranteed Yield



The current FSP reflects changes made by SB 1019 during the 71st Session including an increase in enrichment through the guaranteed yield. Maximum state aid in tier 2 occurs at a lower district wealth amount than maximum state aid in tier 1. Districts with wealth greater than the point indicated by the broken line receive some state aid in tier 1, but no state aid in tier 2. In districts with wealth that exceeds $182,500 per weighted pupil, a penny of tax revenue generates more than $18.25 per student resulting in unequalized enrichment. This is money raised through local property taxes that is unmatched by state funds.

EXHIBIT 20
Average Revenue Per Pupil by Source, by Wealth Decile



The FSP is designed to deliver proportionately more funds to those districts less able to generate local funds.

Exhibit 19 illustrates the relationship between district wealth and state funding for both the basic allotment and guaranteed yield tiers of the Foundation School Program. In both tiers, poorer districts receive a larger percentage of their revenue from the state while wealthier districts fund their operations with a greater percentage of local funds.

Like Exhibit 19, Exhibit 20 shows the inverse relationship between wealth and state aid. This exhibit also depicts that the local effort of the wealthiest group of districts generates more revenue than the combined state, local, and federal amounts of the poorer groups. In most districts however, total revenue per pupil does not vary substantially due to wealth because of the FSP structure.

Federal Funds

Almost all federal funds are appropriated by Congress for specific programs or specific populations of students. These funds must be expended for the designated purposes.

The majority of these federal funds must be spent to supplement programs already in place, not to relieve the state of its financial obligation to provide programs which address the needs of special students. Often, the federal appropriations earmark a certain portion of the state's allocation to be spent by local school districts. This portion is distributed on a formula basis. The remaining allocation is discretionary and may be spent at either the state or local level.

Examples of federal funds distributed to school districts are: the National School Lunch Program, various special education funds, and the Chapter I program for low-income students.

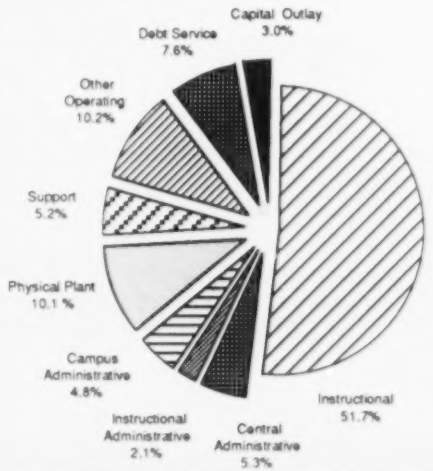
EXPENDITURES

In 1989-90 districts budgeted $13.1 billion in expenditures, or $3,954 per pupil, an almost five percent increase over 1988-89. Total expenditures are divided into current operating and non-operating expenditures. Current operating expenditures are all salaries, services and supplies. Non-operating expenditures are the construction or remodelling of facilities, and the repayment of debt.

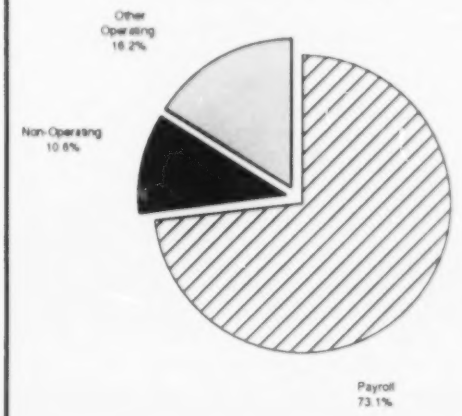
Expenditures are classified by functions, which describe the broad purposes of expenditures, such as instruction or administration. Object classifications describe the items purchased. See Exhibit 21 for a percentage breakdown of various expenditure categories by function, object, and program.

EXHIBIT 21
Expenditure Analyses

Operating Expenditures By Function



Operating Expenditures By Object of Expense



Instructional Expenditures by Program

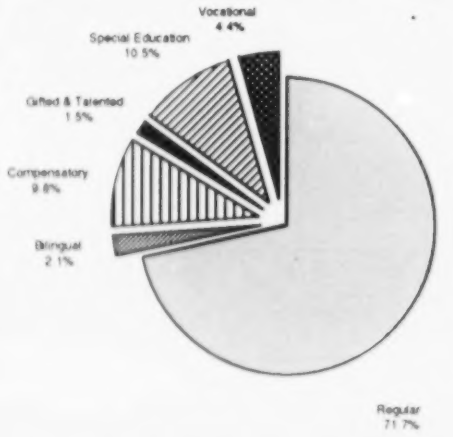


EXHIBIT 22
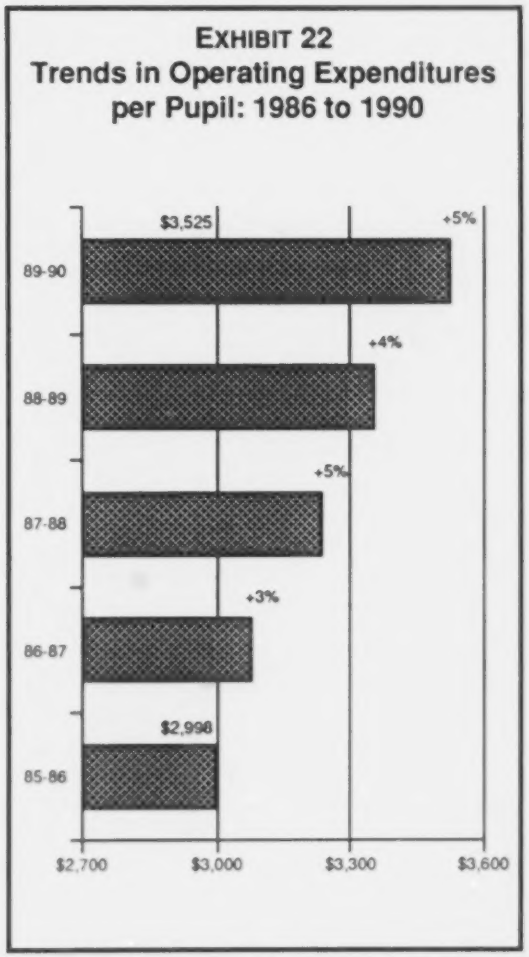
Trends in Operating Expenditures per Pupil: 1986 to 1990



Budgeted operating expenditures per student have increased almost 18 percent since 1985-86. Percentages shown represent year-to-year change.

Expenditures by Function

Expenditures for instruction accounted for over half (52 percent) of all funds budgeted during the 1989-90 school year. Instruction includes all activities dealing directly with the instruction of pupils, including instruction through the use of computers. Teacher and educational aide salaries and classroom equipment are other examples of the types of expenses that are identified in this function.

Other major expenditures by function are in the support services categories, including libraries and pupil services with 5.2 percent; administration, 12.0 percent; and plant services, 10.1 percent.

Expenditures by Object

By object of expense, payroll represents 73.1 percent of all school district expenditures. As a percent of current operating expenditures, payroll accounts for 82 percent. Payroll includes salaries, wages, and employee benefits for school district employees.

Expenditures for other operating categories such as purchased and contracted services, and supplies and materials account for an additional 16.2 percent of the budget. Debt service and capital outlay, non-operating categories, make up the remaining 10.6 percent. Exhibit 22 depicts the increases in per pupil operating expenditures that have occurred since 1985-86.

RECEIPTS AND DISBURSEMENTS

School districts are not the only agencies which spend money for public school education. Although almost 90 percent of the disbursements for public school education are made by local school districts, the remaining 10 percent are spent by other governmental entities such as federal, state, and county governments, and regional Education Service Centers.

Exhibit 23 shows that actual receipts and disbursements are estimated at $15 billion for 1989-90. Receipts, the sum of revenue plus funds raised through the issuance of debt, increased almost eight percent over 1988-89. Disbursements, the total of all expenditures and other uses of funds by all entities for public education, increased by almost seven percent.

The greatest growth in receipts (almost 13 percent) occurred in the "other revenue" category, composed primarily of county and ESC revenue. However, this category accounts for only 0.3 percent of total receipts. The next highest rate of growth, nearly nine percent, occurred in the local revenue category. State revenues increased by only 6.6 percent.

Local disbursements increased by 6.4 percent since 1988-89. Local disbursements are

EXHIBIT 23
1989-90 Receipts and Disbursements by Source

Originating Source	Receipts	Pct. of Total	Disbursements	Pct. of Total	Spending Agents
Local	$6,992,107,794	45.7%	$13,352,754,312	89.4%	Local
State	$6,095,102,164	39.8%	$868,910,629	5.8%	State
Federal	$1,128,198,341	7.4%	$69,696,143	0.5%	Federal
Other (ESC and County)	$44,350,869	0.3%	$136,830,337	0.9%	Other (ESC and County)
TOTAL REVENUE	$14,259,759,168	93.2%	$14,428,191,421	96.7%	TOTAL EXPENDITURES
Other Resources (Debt)	$1,036,803,274	6.8%	$499,708,357	3.3%	Other Uses (Debt)
TOTAL RECEIPTS	$15,296,562,442	100.0%	$14,927,899,778	100.0%	TOTAL DISBURSEMENTS

*The sources of the data shown are TEA accounting records, the TEA's budget request to the Legislative Budget Board, and financial data reported to the TEA by all school districts. Revenues and expenditures in this exhibit do not match revenue and expenditure items in the **District Detail** because the **Detail** reports only budgeted revenues and expenditures of one entity involved in public education spending, local school districts.*

made up of funds from local taxes, and state and federal revenues. State disbursements increased 15.5 percent, primarily due to increases in contributions to the teacher retirement system. Other state disbursements were made for school textbooks, the cost of state-administered schools, and the expenses of the Texas Education Agency.

The federal government contributed food commodities worth $70 million to school districts. A portion of the federal designated purpose funds are spent by the state for agency administration and development projects. ESCs and county governments generated and spent additional funds for district support services.

Proceeds from the sale of bonds and payments on existing debt are not classified as revenues and expenditures, but they do represent other resources committed to public education. Funds raised from the sale of bonds are not immediately spent in the year of collection. In 1989-90, more debt was issued than school districts retired.

Detailed Statistics

Extensive information about students, student performance, district staff, and district finances for 1989-90 follows. Group summary tables and distribution tables are presented on pages 22 through 45, followed by individual school district level data beginning on page 46. In the rare case where information for an individual district is masked, the information is also excluded from any group or state totals.

Category Descriptions

Items are summarized by district size, community type, property wealth, total effective tax rate, and ESC region. A description of each of these summary groups is provided below:

Refined Average Daily Attendance

Districts are grouped into nine size categories according to their refined ADA for the year. Districts of similar size are grouped together.

Community Type

Districts are classified on a scale ranging from major urban to rural. Factors such as size, growth rates, and proximity to an urban area are used to determine the appropriate group. The groups are:

Major Urban. The eight largest school districts in the state which serve the metropolitan areas of Houston, Dallas, San Antonio, Fort Worth, Austin, Corpus Christi, and El Paso.

Major Suburban. Other school districts in and around the major urban areas.

Other Central City. The major school districts in other large Texas cities.

Other Central City Suburban. Other school districts in and around the other large, but not major, Texas cities.

Independent Town. The largest school districts in the counties with populations of 25,000 to 100,000.

Non-Metro: Fast Growing. The school districts that fail to be in any of the above categories and that exhibit a five-year growth rate of at least 20 percent. These districts must have a student population of at least 300 ADA.

Non-Metro: Stable. The school districts that fail to be in any of the above categories, yet have a student population that exceeds the state median, which in 1989-90 was 718 ADA.

Rural. The school districts that fail all of the above tests for placement into a category. These districts either have an ADA between 300 and the state median and a growth rate less than 20 percent, or they have an ADA less than 300.

Total Effective Tax Rates

Districts are grouped into four categories, or quartiles, with approximately equal numbers of districts in each. The category shows the total effective tax rate, which is determined by dividing the 1989 total levy amount by the 1989 SPTB total taxable property value. The six special statutory districts do not levy property taxes.

Property Wealth

Wealth is defined as total taxable property value per refined ADA and is used as an indicator of a district's ability to raise local funds. The property value used is 1989 taxable value as determined by the State Property Tax Board (SPTB). Districts are classified into 20 categories with approximately equal numbers of students in each, or approximately five percent of total refined ADA per category. The six special statutory districts form the 21st group because they have no taxable property wealth.

Education Service Center Regions

The state is divided into 20 geographic regions, each served by an Education Service Center. The number of districts assigned to each ESC region varies.

Distribution Statistics

This information is presented to help readers better understand the distribution of a particular item among Texas public school districts. By examining the variance between the high, low, and intermediate values, it is possible to determine whether districts behave similarly, as in the case of pupil to teacher ratios, or very differently, as in the case of the number of students enrolled.

Each item is analyzed independently: the district with the highest value for one item is not necessarily the district with the highest value for other items. The terms used are defined below:

Lowest (Highest) Value. For any given item, the lowest (highest) value found among all the districts.

XXth Percentile. For any given item, a value chosen such that XX percent of the school districts are below the chosen value. For example, the 10th percentile means that 10 percent of the school districts have values lower than the value shown.

Median. For any given item, a value chosen such that half of the school districts are below the chosen value, and half are above.

State Total. For most items this is the sum of all the reported district values. For ratios or percent calculations, the state total is computed as the sum of all the numerators, divided by the sum of all the denominators. For these items, the state total is a weighted state average.

District Detail

The information for school districts is sequenced such that all 91 data items are presented in a six page layout for approximately 30 districts at a time. The 91 items pertain to students, student performance, district staff, and district finances.

Districts are sequenced alphabetically within counties. Counties are numbered and are also arranged alphabetically. To locate a particular district by name, see the *District Listing* in the appendix. This listing provides the county and county number needed to find a district in the *District Detail* section. As with the grouped reports (size, type, tax effort, wealth, ESC regions) and *Distribution Statistics*, a state summary line concludes the *District Detail*.

Definitions of the 91 data items begin on page 256.

ITEM DEFINITIONS

Items are defined in the sequence they appear in the *District Detail* section of the report. The data items are numbered to correspond with numbers used in the column headings. To ascertain data sources for these items, refer to the *Data Sources* appendix which cross references sources with the items defined below.

COUNTY NUMBER AND NAME: The county number is a unique identifier assigned to each county for administrative purposes. The numbers correspond to the alphabetic arrangement of county names.
(Source: TEA District Master Files).

DISTRICT NAME: The name of the district which includes a designator for the governance system. These designators are:

ISD INDEPENDENT SCHOOL DISTRICT
A locally elected board of trustees governs the district.

CSD COMMON SCHOOL DISTRICT
The county commissioners court governs the school district.

MSD MUNICIPAL SCHOOL DISTRICT
The city council governs the school district.

Most school districts are independent school districts. Due to space limitations, the "ISD" designation has been omitted but other governance designators have been retained.
(Source: TEA District Master Files).

REGION: The Education Service Center region to which the district is assigned based upon its geographic location. There are 20 ESCs serving districts in the various areas of the state.
(Source: TEA District Master Files).

CO-OP STATUS: An indicator of whether or not a district participates in a Special Education cooperative. An "F" indicates the district is a fiscal agent, an "M" indicates the district is a member, and a blank means the district does not participate. For these districts, dollar amounts per student may be distorted because student counts and amounts budgeted may be reported by different districts. Districts participating in other types of cooperatives are not indicated.
(Source: Special Ed. Co-ops).

1. **STATE BOARD OF EDUCATION DISTRICT:** The number of the SBOE district to which the school district is assigned based upon its geographic location. If a district is represented by more than one SBOE district, the district associated with the location of the central office is reported. See Exhibit E, the State Board of Education District Map, in the *End Notes* appendix.
(Source: Texas Legislative Council Maps).

2. **ACCREDITATION STATUS:** The accreditation status of the district as of May 1990. The Division of Accreditation visits some 200 districts each year and re-evaluates their status. Districts are classified as either FA-Fully Accredited; AD-Advised; WN-Warned; UN-Unaccredited; or PR-Probationary.

Advised means there are discrepancies between the district's program or operations and accreditation requirements. Warned means there are serious discrepancies of the type described above, or the district has not corrected deficiencies for which it was advised. Unaccredited means the district's accreditation has been revoked by the commissioner due to failure to meet or maintain compliance with accreditation requirements. Probationary means the district is new or is adding grades and has not yet received a full accreditation review.

As of May 1990, 96 percent of the districts in the state were fully accredited. The status of districts changes continuously. The current status of any district may be different than that shown in this publication.
(Source: Division of Accreditation).

3. **NUMBER OF REGULAR HIGH SCHOOLS:** The number of high school campuses in a district identified by the range of grades offered as reported to TEA. The most common grades offered for each of the types are: Elementary, grades K-6; Middle School, grades 6-8; Junior High, grades 7-8; High Schools, grades 9-12; Elementary/Secondary, grades K-12. See Exhibit A in the *End Notes* for the details of which grades offered fall into each category.
(Source: TEA District Master Files).

4. **TOTAL ENROLLMENT:** The number of students in membership as of October 2, 1989, in grades pre-kindergarten through twelve.
(Source: Fall Survey of Pupils).

5. **FIVE YEAR % CHANGE IN ENROLLMENT:** The percent change in total enrollment for the five year period from 1985-86 to 1989-90.
(Source: Fall Survey of Pupils).

6. **% WHITE:** Percentage of enrollment reported as white.
(Source: Fall Survey of Pupils).

7. **% AFRICAN AMERICAN:** Percentage of enrollment reported as African American.
(Source: Fall Survey of Pupils).

8. **% HISPANIC:** Percentage of enrollment reported as Hispanic.
(Source: Fall Survey of Pupils).

9. **% OTHER:** Percentage of enrollment reported as other. Other is the combination of Asian and American Indian/Eskimo counts.
(Source: Fall Survey of Pupils).

10. **PRIOR YEAR DROPOUT RATE:** The total number of 1988-89 dropouts reported in grades 7-12 expressed as a percent of the total number of students enrolled in grades 7-12 in 1988-89.

    Students reported absent for a period of 30 or more consecutive days between September 1988 and August 1989 without prior approval or documented transfer to another public secondary school are included in this total. This total also includes students that failed to re-enroll at the beginning of the 1989-90 school year.

    Districts which reported that no students dropped out have a zero (0) dropout rate. If no data were reported or dropout data are not required for a district because only lower grades are offered, then an asterisk is printed.

    Many districts requested changes to their dropout data after September 1990, usually because a student was located after the PEIMS "as of" reporting date. However, the dropout data in this publication reflect counts of dropouts as they are stored in the PEIMS database for the fall 1989 submission.
    (Source: PEIMS, 201; Fall Survey of Pupils).

11. **ATTENDANCE RATE:** Total attendance expressed as a percent of total membership for the four weeks reported during October 1989.
(Source: PACH, Table I, Fall Survey of Pupils).

12. **% LOW INCOME:** The percentage of students participating in the free and reduced price lunch program computed as the best six months average claims for 1988-89 divided by 1989-90 refined ADA. Students identified as low income in this manner may or may not be enrolled in a special program.
(Source: NSL Report; PACH, Table I).

13. **NUMBER OF HIGH SCHOOL GRADUATES:** The number of high school students graduated from the district during the 1989-90 school year.
(Source: SAR, Part II, Table I).

14. **% PLANNING TO ATTEND COLLEGE:** The number of students who self-report that they plan to attend college within one year of graduation expressed as a percent of total graduates.
(Source: SAR, Part II, Table I).

15. **% SPECIAL EDUCATION:** Students identified as enrolled in special education expressed as a percent of total enrollment. Students in special education may also be counted in another special program such as vocational or bilingual education.
(Source: Fall Survey of Pupils).

16. **% BILINGUAL/ESL EDUCATION:** Limited English Proficient (LEP) students identified in Bilingual Education or English as a Second Language (ESL) expressed as a percent of total enrollment. Students identified as in bilingual education, in ESL, under bilingual education exception, under ESL waiver, or special education in bilingual/ESL are included. Students in bilingual/ESL education may also be counted in another special program such as special or vocational education.
(Source: Bilingual Fall Survey; Fall Survey of Pupils).

17. **% VOCATIONAL EDUCATION:** Students identified as taking vocational education courses expressed as a percent of total enrollment. Students in vocational education may also be counted in another special program such as special or bilingual education.
(Source: Vocational Head-Count; Fall Survey of Pupils).

18. **% GIFTED AND TALENTED:** Students identified and served in operational Gifted and Talented programs expressed as a percent of total enrollment. Students in gifted and talented education may also be counted in another special program such as vocational or bilingual education.
(Source: PACH, Table V; Fall Survey of Pupils).

19. **% PASSING ALL GRADES:** For all grades and subject areas, the total number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TEAMS).

20. **% PASSING GRADE 3 (ENGLISH):** For all grade three subject area tests (in English), the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TEAMS).

21. **% PASSING GRADE 5:** For all grade five subject area tests, the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TEAMS).

22. **% PASSING GRADE 7:** For all grade seven subject area tests, the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TEAMS).

23. **% PASSING GRADE 9:** For all grade nine subject area tests, the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TEAMS).

24. **% PASSING GRADE 11:** For both grade eleven subject area tests, the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Grade 11 test results are reported for students taking the test for the first time only, and are from the October 1989 administration of the test. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TEAMS).

25. **% WHITE STUDENTS PASSING:** For all grades and subjects, the number of white students who passed all tests taken, expressed as a percentage of the total number of white students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TEAMS).

26. **% AFRICAN AMERICAN STUDENTS PASSING:** For all grades and subjects, the number of African American students who passed all tests taken, expressed as a percentage of the total number of African American students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TEAMS).

27. **% HISPANIC STUDENTS PASSING:** For all grades and subjects, the number of Hispanic students who passed all tests taken, expressed as a percentage of the total number of Hispanic students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TEAMS).

28. **% OTHER STUDENTS PASSING:** For all grades and subjects, the number of Asian and American Indian/Eskimo students who passed all tests taken, expressed as a percentage of the total number of Asian and American Indian/Eskimo students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TEAMS).

29. **NUMBER TESTED (SAT):** The count of graduating seniors who took the Scholastic Aptitude Test (SAT) at least once prior to May 1989.
(Source: SAT/ACT File).

30. **MEAN TOTAL SCORE (SAT):** The sum of the mathematics and verbal portions of the SAT divided by the number of graduating seniors tested. Total scores for the SAT range from 400 to 1600 and include only the most recent scores received by graduates on an SAT taken anytime during their high school years. Scores are reported for twelfth graders scheduled to graduate during the 1988-89 school year.

    If no students were tested or no scores were reported, then an asterisk is printed. "LT5" will appear in cases where fewer than five students were tested to protect the confidentiality of the students' test scores.
    (Source: SAT/ACT File).

31. **NUMBER TESTED (ACT):** The count of graduating seniors who took the American College Test (ACT) during either the 1987-88 or 1988-89 school years.
    (Source: SAT/ACT File).

32. **MEAN COMPOSITE SCORE (ACT):** The average of the scores from the English, mathematics, social studies, and natural science portions of the ACT. Composite scores for the ACT range from 1 to 35 and include only the most recent scores received by graduates during either the junior or senior years. Scores are reported for twelfth graders who graduated in the end of the 1988-89 school year.

    If no students were tested or no scores were reported, then an asterisk is printed. "LT5" will appear in cases where fewer than five students were tested to protect the confidentiality of students' test scores.
    (Source: SAT/ACT File).

33. **TOTAL STAFF FTE:** A count of all personnel employed by the school district as of fall 1989, including both professional and non-professional positions. All staff counts are expressed as full-time equivalents. The appropriate portion of an FTE is allocated to each of the responsibilities associated with an individual based on a percentage of total time worked.
    (Source: PEIMS, 050).

34. **TOTAL TEACHER FTE:** The FTE count of personnel categorized as teachers, including special duty teachers. Substitute teachers are not included.
    (Source: PEIMS, 050, 090).

35. **% CENTRAL ADMINISTRATIVE STAFF:** The FTE count of personnel classified as administrators in the central office, expressed as a percent of total staff FTE's. Central office administrators include assistant superintendents, superintendents, business managers, tax assessor collectors, directors of personnel; as well as administrative officers, instructional officers and athletic directors if reported with a '700' campus code.
    (Source: PEIMS, 050, 090).

36. **% CAMPUS ADMINISTRATIVE STAFF:** The FTE count of personnel classified as campus administrators, expressed as a percent of total staff FTE's. Campus administrators include assistant principals, principals; as well as administrative officers, instructional officers and athletic directors if reported with a campus code other than '700'.
    (Source: PEIMS, 050, 090).

37. **% PROFESSIONAL SUPPORT STAFF:** The FTE count of personnel categorized as support staff expressed as a percent of total staff FTEs. Support staff are defined as therapists, psychologists, counselors and social workers, diagnosticians, physicians and nurses, librarians, supervisors, and miscellaneous other support roles. See Exhibit D in the *End Notes* for a complete listing.
    (Source: PEIMS, 050, 090).

38. **% TEACHERS:** The teacher FTE count expressed as a percent of total staff FTEs.
    (Source: PEIMS, 050, 090).

39. **% EDUCATIONAL AIDES:** The FTE count of personnel categorized as educational aides expressed as a percent of total staff FTEs. Educational aides are involved in instructional support.
    (Source: PEIMS, 050, 090).

40. **% AUXILIARY STAFF:** The FTE count of personnel categorized as auxiliary staff expressed as a percent of total staff FTEs. Auxiliary staff are those personnel for whom no role was reported. Examples include cafeteria workers and bus drivers.
    (Source: PEIMS, 050, 090).

41. **AVERAGE CENTRAL ADMINISTRATIVE SALARY:** The total salary of central administrators divided by the total FTE count of central administrators. The total salary amount includes base pay only; any supplements are excluded.
    (Source: PEIMS, 060).

42. **AVERAGE CAMPUS ADMINISTRATIVE SALARY:** The total salary of campus administrators divided by the total FTE count of campus administrators. The total salary

amount includes base pay only; any supplements are excluded.
(Source: PEIMS, 060).

43. **AVERAGE PROFESSIONAL SUPPORT SALARY:** The total salary of professional support staff divided by the total FTE count of professional support staff . The total salary amount includes base pay only; any supplements are excluded.
(Source: PEIMS, 060).

44. **AVERAGE TEACHER SALARY:** The total salary of teachers divided by the total FTE count of teachers. The total salary amount is base pay only, and does not include career ladder or any other supplements.
(Source: PEIMS, 060).

45. **% MINORITY STAFF:** The FTE count of all personnel reported as non-white expressed as a percent of total staff FTEs.
(Source: PEIMS, 040).

46. **RATIO OF STUDENTS TO TOTAL STAFF:** The total number of students enrolled divided by the total staff FTE count.
(Source: Fall Survey of Pupils; PEIMS, 050).

47. **RATIO OF STUDENTS TO TEACHERS:** The total number of students enrolled divided by the total teacher FTE count.
(Source: Fall Survey of Pupils; PEIMS 090).

48. **AVERAGE TEACHER APPRAISAL SCORE:** The total of all appraisal scores divided by the number of teachers appraised. Appraisal scores are based on a statewide teacher appraisal system which provides a process and criteria with which to evaluate the performance of teachers for career ladder level assignment purposes. Beginning in 1988-89, the range of appraisal scores changed from 0-5 to 0-184. In 1989-90 the acceptable minimum score was changed to 0.1.

0.1	-	79.9	Unsatisfactory
80.0	-	103.9	Below Expectations
104.0	-	135.9	Meets Expectations
136.0	-	159.9	Exceeds Expectation
160.0	-	184.0	Clearly Outstanding

(Source: PEIMS, 050).

49. **% TEACHERS WITH 1 OR MORE PERMITS:** The FTE count of teachers holding at least one permit as of fall 1989, expressed as a percent of the total teacher FTE count. Teachers with multiple permits are counted only once.

TEA issues four types of permits that meet different situations and require different qualifications: emergency teaching, nonrenewable, special assignment, and vocational. Superintendents may activate temporary classroom assignment permits without TEA approval. Teachers holding one or more of *any* of these types of permits are included in the count.
(Source: PEIMS, 080).

50. **% WITH 5 OR FEWER YEARS OF EXPERIENCE:** The FTE count of teachers with zero through five total years of teaching experience expressed as a percent of the total teacher FTE count. Total years of teaching experience includes experience earned in another Texas school district or in another state.
(Source: PEIMS, 040).

51. **AVERAGE YEARS OF EXPERIENCE:** A weighted average obtained by multiplying each teacher's FTE count by his or her years of experience, summing for all weighted counts, and then dividing by total teacher FTEs. Adjustments have been made so that teachers with zero years of experience are appropriately weighted in the formula.
(Source: PEIMS, 040).

52. **% WITH ADVANCED DEGREES:** The FTE count of teachers with master's or doctorate degrees expressed as a percent of total teachers.
(Source: PEIMS, 040).

53. **% ON CAREER LADDER LEVEL 2:** The Fall of 1989 FTE count of teachers reported as placed on level two, expressed as a percent of total teachers. Many districts do not make career ladder placement decisions until the end of the school year; therefore counts may be under-reported.
(Source: PEIMS, 050).

54. **% ON CAREER LADDER LEVEL 3:** The fall 1989 FTE count of teachers reported as placed on level three, expressed as a percent of total teachers. Many districts do not make career ladder placement decisions until the end of the school year; therefore counts may be under-reported.
(Source: PEIMS, 050).

55. **% WHITE:** The FTE count of teachers reported as white expressed as a percent of total teacher FTEs.
(Source: PEIMS, 040).

56. **% AFRICAN AMERICAN:** The FTE count of teachers reported as African American expressed as a percent of total teacher FTEs.
(Source: PEIMS, 040).

57. **% HISPANIC:** The FTE count of teachers reported as Hispanic expressed as a percent of total teacher FTEs.
(Source: PEIMS, 040).

58. **% OTHER:** The FTE count of teachers reported as Asian or American Indian/Eskimo expressed as a percent of total teacher FTEs.
(Source: PEIMS, 040).

59. **% REGULAR EDUCATION:** The FTE count of teachers identified as serving students receiving regular education instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090).

60. **% SPECIAL EDUCATION:** The FTE count of teachers identified as serving students receiving special education instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090).

61. **% COMPENSATORY EDUCATION:** The FTE count of teachers identified as serving students receiving compensatory education instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090).

62. **% BILINGUAL/ESL EDUCATION:** The FTE count of teachers identified as serving limited English proficient (LEP) students in bilingual education or English as a Second Language (ESL) instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090).

63. **% VOCATIONAL EDUCATION:** The FTE count of teachers identified as serving students receiving vocational education instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090).

64. **% OTHER EDUCATION (INCLUDES GIFTED AND TALENTED):** The FTE count of teachers identified as serving students receiving gifted and talented education instruction, students in honors classes and students served in migrant programs, expressed as a percent of total teacher FTEs. On average, approximately 96 percent of this category consists of teachers serving gifted and talented or honor students.
(Source: PEIMS, 090).

65. **TAXABLE VALUE PER PUPIL:** The district's total taxable property value in 1989 as determined by the State Property Tax Board, divided by the total refined ADA of the district in 1989-90. This property value is determined by the SPTB as part of its annual study which attempts to present uniformly appraised property valuations statewide. The SPTB value is calculated by applying ratios created from uniform independent appraisals to the district's assessed valuations.
(Sources: SPTB, Study; PACH, Table I).

66. **EQUALIZED TOTAL TAX RATE:** The total tax levy for the 1989-90 school year divided by the 1989 SPTB taxable value. The total tax levy is the sum of the maintenance and operation and debt service levies generated by applying a district's adopted tax rates to its locally assessed valuation of property. An equalized, or effective, tax rate is the rate that is necessary to raise a district's actual tax levy when applied to the district's total taxable value as determined by the SPTB. (NOTE: The SPTB taxable value is not the same as the locally assessed value.)
(Sources: SPTB, Study; SPTB, Self Report).

67. **STATE AID AND LOCAL TAXES PER PUPIL:** The amount of state money allocated to the school district under the Foundation School Program plus the levy amount generated by the locally adopted total tax rate of the district. This amount divided by total enrollment results in the per pupil amount shown. This item indicates the total estimated amount of funds available to the district from both state and local sources, both within and outside of the FSP system. Unequalized local funds are included in this amount. The state money component of this item is the same amount shown in item #69. The amount of unequalized revenue is the difference between item #68 and item #67.
(Sources: Foundation Master; Fall Survey of Pupils).

68. **TOTAL FSP REVENUE PER PUPIL:** The level of revenue which is recognized and supported by the equalized state system. This amount includes estimates of all state and local funds available to the district that are in Tier I and Tier II of the Foundation School Program. Local enrichment that is outside the FSP (unequalized local enrichment) is not included in this amount. This amount divided by total enrollment results in the per pupil amount shown.
(Sources: Foundation Master; Fall Survey of Pupils).

69. **STATE AID PER PUPIL:** The estimated amount of state money allocated to the school district under the Foundation School Program divided by each district's total enrollment. This amount is a component of item #67.
(Sources: Foundation Master; Fall Survey of Pupils).

70. **TOTAL REVENUE:** Budgeted revenue from all local, state, and federal sources, except for receipts from the sale of bonds and other revenues budgeted in fund 60, the capital projects fund. See Exhibit C in the *End Notes* for a technical description of this item. *Bulletin 679, Financial Accounting Manual*, sets standards for the accounting of revenues.
(Source: PEIMS, 030).

71. **TOTAL REVENUE PER PUPIL:** Total revenue divided by total enrollment.
(Sources: PEIMS, 030; Fall Survey of Pupils).

72. **% STATE:** Revenue from state sources, such as per capita and foundation program payments, revenue from other state funded programs such as Adult Basic Education, and revenue from other state agencies, expressed as a percent of total revenue. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

73. **% LOCAL AND OTHER:** Revenue from local taxes, other local sources, and intermediate sources expressed as a percent of total revenue. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

74. **% FEDERAL:** Revenue received directly from the federal government or distributed by TEA for vocational education, programs for educationally disadvantaged children, food service programs, and other federal programs, expressed as a percent of total revenue. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

75. **TOTAL EXPENDITURES:** Budgeted outlays of money for all functions and objects, except for expenditures budgeted in fund 60, the capital projects fund. *Bulletin 679, Financial Accounting Manual* sets standards for the accounting of expenditures.

Expenditures are accounted for using codes for fund, function, object, organization; and, in some cases, program area. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

76. **% INSTRUCTIONAL:** The percentage of total expenditures budgeted for instructional expenditures in the district. Instructional expenditures include expenditures for all activities dealing directly with the instruction of pupils, including instruction aided with computers. See Exhibit C in the End Notes for a technical description of this item.
(Source: PEIMS, 030).

77. **% CENTRAL ADMINISTRATIVE:** The percentage of total expenditures budgeted for central administration expenditures in the district. Central administrative expenditures include expenditures for the general administration of the district, the development of personnel and curriculum, and data processing services. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

78. **% CAMPUS ADMINISTRATIVE:** The percentage of total expenditures budgeted for campus administration expenditures in the district. Campus administration expenditures include expenditures for the operation and management of a school. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

79. **% PLANT SERVICES:** The percentage of total expenditures budgeted for physical plant maintenance and operation. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

80. **% OTHER OPERATING:** The percentage of total expenditures budgeted for all other operating expenditures in the district. Other operating expenditures include expenditures for support services, pupil transportation, food services, and co-curricular activities. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

81. **NON-OPERATING:** The percentage of total expenditures budgeted for non-operating expenditures in the district. Non-operating expenditures include capital outlay expenditures not made from fund 60, the capital projects fund; debt service expenditures; and, ancillary services expenditures. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

82. **TOTAL OPERATING EXPENDITURES:** The sum of all expenditures budgeted for the operation of the district. The operating expenditures are a subset of the total expenditures; they do not include debt service or capital outlay. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

83. **TOTAL OPERATING EXPENDITURES PER PUPIL:** Total operating expenditures divided by total enrollment.
(Sources: PEIMS, 030; Fall Survey of Pupils).

84. **TOTAL INSTRUCTIONAL EXPENDITURES:** The sum of budgeted expenditures for all activities dealing directly with the instruction of pupils, including instruction through the use of computers. This is the amount used in the percent calculation for item 76.
(Source: PEIMS, 030).

85. **TOTAL INSTRUCTIONAL EXPENDITURES PER PUPIL:** Budgeted instructional expenditures divided by total enrollment.
(Sources: PEIMS, 030; Fall Survey of Pupils).

86. **% REGULAR EDUCATION:** Expenditures budgeted for the regular education program expressed as a percent of total instructional expenditures. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

87. **% SPECIAL EDUCATION:** Expenditures budgeted for the special education program expressed as a percent of total instructional expenditures. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

88. **% COMPENSATORY EDUCATION:** Expenditures budgeted for the compensatory education program expressed as a percent of total instructional expenditures. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

89. **% BILINGUAL/ESL EDUCATION:** Expenditures budgeted for the bilingual education and English as a Second Language programs expressed as a percent of total instructional expenditures. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

90. **% VOCATIONAL EDUCATION:** Expenditures budgeted for the vocational education program expressed as a percent of total instructional expenditures. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

91. **% GIFTED AND TALENTED EDUCATION:** Expenditures budgeted for the gifted and talented education program expressed as a percent of total instructional expenditures. See Exhibit C in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

Appendix

DATA SOURCES

Data sources are arranged in alphabetical order by the abbreviations used in the *Item Definitions* section.

BILINGUAL EDUCATION FALL SURVEY: The October, 1989 *Bilingual Education Fall Survey*. This report provides a head count of the number limited English proficient (LEP) students identified in the district. Counts of LEP students are collected by grade and by type of program, i.e. bilingual, English as a Second Language (ESL), or some combination of these two. Special education students in bilingual education or ESL are also collected, as are counts of students identified but not served due to parental denial. *Item 16.*

DIVISION OF ACCREDITATION: A Texas Education Agency division that is responsible for accrediting school districts. This division maintains information regarding the current accreditation status of all districts in the state. The information is updated frequently to reflect the results of site visits by accreditation teams. Accreditation status in this publication were current as of May 1990. *Item 2.*

FALL SURVEY OF PUPILS: *The Fall Survey of Pupils in Membership* taken on October 2, 1989. This report provides a one day head count of the total number of students enrolled on the first Monday of October each school year. Counts of students are collected by campus, by grade, by ethnicity, by gender, and by population type (either regular or special education). *Items 4-11, 15-18, 46, 47, 67-69, 71, 83, 85; Exhibits 1, 7, 8, 20, 22.*

FOUNDATION MASTER: A TEA data file that contains detailed information about state funding amounts and calculations for each entity receiving state monies under the Foundation School Program. *Items 67-69.*

NSL REPORT: The 1988-89 *National School Lunch Report*. This report provides a count of the number of students participating in the Free and Reduced Price Lunch program. The Division of State Funding calculates the best (highest) six month average from the information submitted by school districts to the Division of School Lunch. *Item 12.*

PACH, TABLE I: The *Superintendent's Report of Pupil Attendance and Contact Hours, Table I.* This report is submitted in the fall and spring of each year. Attendance and contact hour information is collected by week and grade level for four weeks in October and four weeks in February through March. The Division of State Funding calculates the best (highest) four week average daily attendance from the total eight weeks reported. *Items 11, 12, 65; Exhibits 5-6, 9, 13.*

PACH, TABLE V: The *Superintendent's Report of Pupil Attendance and Contact Hours, Table V, "Superintendent's Summary of Gifted/Talented Students."* This report is submitted by districts in the fall and spring of each year. Counts of students by grade for both operational and developmental gifted and talented programs are provided. Counts in the developmental program reflect the number of students the district expects to serve in the operational program the following year. Counts in the operational program reflect students served at any time during the four weeks of the attendance accounting period in each semester. *Item 18.*

PEIMS: All information in this document from the *Public Education Information Management System* was reported in the fall 1989 submission. Districts were asked to report data as of October 27, 1989. Districts reported budgeted financial data for the entire 1989-90 school year. For more information about the fall and spring PEIMS reporting requirements see the *1989-90 Data Standards for School District Data Submission, Volumes I and II.* PEIMS data sources have been subdivided by type of information reported.

030: **Budget Amounts.** Amounts budgeted by the district, or campus if appropriate, reported by fund, function, object, and in some cases by program. *Items 70-91; Exhibits 17, 20-22.*

040: **Staff Demographics.** Information about each employee's gender, ethnicity, years of experience, and post-secondary degree. *Items 45, 50-52, 55-58; Exhibit 14.*

050: **Employment Characteristics.** Information for each employee such as tenure, full-time equivalency status, and career ladder information. *Items 33-40, 46, 48, 53, 54; Exhibit 16.*

060: Payroll. The payroll amounts paid to each employee. Both base pay and any supplement amounts are reported by fund, function, object, and program. *Items 41-44; Exhibit 15.*

080: Permit. The type of permit, issue date, renewal date, role of the individual permitted, and permit subject area. *Item 49.*

090: Responsibilities. The duties performed by each professional employee. Districts report each class schedule for the employees who are teachers. *Items 34-40, 47, 59-64; Exhibits 12, 13.*

201: Basic Dropout Data. Last known information about a dropout; last campus of enrollment, grade level, special education indicator, free and reduced price lunch eligibility indicator, and exit reason. Also this record contains demographics about the dropout such as gender, ethnicity, and age. *Item 10; Exhibits 8, 9.*

SAR PART II, TABLE I: The *Superintendent's Annual Report, Part II, Table I.* Table I, "Graduates of Senior High Schools," reports the number of students graduating between June 1, 1989, and May 31, 1990, by ethnicity, gender, and age. Also reported are the number of graduates who have entered or plan to enter college in the summer or fall of 1990. *Items 13, 14; Exhibit 8.*

SAT/ACT FILE: With permission from public school districts, a file created by the TEA from Scholastic Aptitude Test (SAT) scores released by the College Board's Admissions Testing Program and ACT scores released by the American College Testing Program for Texas graduating seniors. Both testing programs typically release summary test score statistics to the TEA, the media, and the public each September for Texas seniors who graduated during the previous school year. However, the more detailed data linking students' scores to campuses and districts (which are used to create the TEA file) typically become available in the following spring. Thus, with the publication schedule, the test scores in this document are for 1988-89 graduating seniors. *Items 29-32. Exhibit 11.*

SPECIAL ED. CO-OPS.: An annual TEA data file maintained by the Division of Special Education Funding and Compliance which indicates for each district whether or not the district is a member or fiscal agent of a special education cooperative, the type of district, how many members are in the cooperative, and if applicable, the cooperative name. *No item number; indicator that follows district name.*

SPTB, SELF REPORT: The *State Property Tax Board 1989 Self Report.* This report contains local tax roll assessed values for property, levy amounts, and tax rate information for all school districts with taxable property. *Item 66. Exhibit 18.*

SPTB, STUDY: The *State Property Tax Board 1989 Property Value Study,* May 31, 1990. This study provides local tax role property values as of January 1, 1989 for each district by category of land use as well as SPTB re-evaluated values. *Items 65, 66. Exhibit 18.*

TEA DISTRICT MASTER FILES: TEA data files containing basic organizational attributes about school districts including district name and identification number, county name and number, Education Service Center region, State Board of Education district, type of district (regular FSP, special statutory, or state-administered), and mailing address. *Item 3; Exhibits 1-4.*

TEAMS: The Texas Educational Assessment of Minimum Skills test results for grades 3, 5, 7, and 9 from the February 1990, administration of the test, and grade 11 results from the October 1989, administration. In addition to percent passing by grade and subject, the TEAMS test results indicate several characteristics of the students tested. *Items 19-28; Exhibit 10.*

TEXAS LEGISLATIVE COUNCIL MAPS: The Legislative Council maintains maps illustrating the State Board of Education districts which are defined by statute. The legal descriptions of the districts are available in *Texas Education Code* 11.21 Composition of the Board. *Item 1.*

VOCATIONAL HEAD COUNT: The *Vocational Program Head-Count Report* from the spring of 1990. This report, submitted by school districts offering a vocational education program, provides counts of students enrolled in vocational education courses between July 1, 1989 and February 2, 1990. Students are to be counted only once regardless of the number of vocational courses in which they were enrolled. *Item 17.*

END NOTES

ASSESSED VALUATION: This is the locally assessed value of property that a district actually taxes. Property values are assessed by county appraisal districts, not the school districts. Assessment practices can vary from district to district; that is, two properties of equal worth may not be appraised at the same value in two different districts. District practices in exempting property from taxation also vary. TEA receives information about locally assessed valuation from the State Property Tax Board, another state agency.

AVAILABLE SCHOOL FUND: The Available School Fund (ASF) was constitutionally created in 1876. It consists primarily of earnings from the Permanent School Fund and taxes dedicated to the fund by the state constitution. Most of the ASF revenue is distributed to local school districts on a per capita basis which is set by the State Board of Education using annual earnings estimates for the fund. The per capita apportionment to school districts in 1989-90 is $299 per refined ADA. The ASF also pays for school textbooks.

BUDGET BALANCED: Districts which receive no Foundation School Program aid, except the constitutionally mandated Available School Fund per capita allotment, are called budget balanced. These districts are not required to raise their Local Fund Assignment since they do not participate in the FSP. Districts identified as budget balanced are those in which the sum of the Available School Fund payment plus the Local Fund Assignment is greater than the Foundation School Program budget as determined by state formulas.

CAMPUS TYPE: Campuses are divided into types according to the range of grades offered as reported to the TEA. The grid in Exhibit A shows the possible combinations of low and high grades for each of the campus types. For example, a campus offering a low grade of 5, found along the left edge of the grid, and a high grade of 6, found along the top edge of the grid, is classified as a middle school. A campus offering only grade 9 (both the low and high grade) is a high school.

CROSSWALK OF PRIOR YEAR ITEMS: Exhibit B provides a comparison of the 69 data items of prior ***Snapshot*** editions to the 91 items in this edition.

ETHNICITY: Counts of students and staff are collected by major ethnic group. Counts of student enrollments by ethnic group are reported on the *Fall Survey of Pupils*. Counts of staff are derived from the fall 1989 PEIMS collection. These major ethnic groups are white, Hispanic, African American, Asian, and American Indian/Pacific Islander. In this publication "other" is presented as the sum of Asian and American Indian/Pacific Islander.

EXPENDITURE FUNCTIONS: An expenditure function designates the purposes for which expenditures are made. Function codes used by school districts are outlined in section CDE-403 of *Bulletin 679, Financial Accounting Manual*. Functions for which money can be spent are:

- 11 Instruction;
- 12 Instructional Computing;
- 21 Instructional Administration;
- 22 Instructional Resources & Media Services;
- 23 School Administration;
- 24 Instructional Research & Development;
- 25 Curriculum & Personnel Development;
- 26 Communication and Dissemination;
- 31 Guidance and Counseling Services;
- 32 Attendance and Social Work Services;
- 33 Health Services;
- 34 Pupil Transportation;
- 36 Co-curricular Activities;
- 37 Food Services;
- 41 General Administration;
- 42 Debt Services;
- 51 Plant Maintenance and Operation;
- 52 Facilities Acquisition & Construction;
- 71 Management;
- 72 Computer Processing;
- 73 Development;
- 74 Interfacing/Technical Assistance; and
- 81 Community Services.

Exhibit C lists the function codes included in the revenue and expenditure items found in the *District Detail* section.

EXPENDITURE OBJECTS: These are categories of expenditures. Object codes are outlined in section CDE-409 of *Bulletin 679, Financial Accounting Manual*. Objects for which money can be spent are:

6100-Payroll Costs;
6200-Purchased & Contracted Services;
6300-Supplies & Materials;
6400-Other Operating Expenditures;
6500-Debt Service; and
6600-Capital Outlay.

Exhibit C lists the object codes included in the revenue and expenditure items found in the *District Detail* section.

FULL-TIME EQUIVALENTS: All staff counts are shown in terms of full-time equivalents (FTEs), a measure of the extent to which a person occupies a full-time position. For example, a teacher working a full day for the entire school year represents one FTE, a full-time teacher working one semester represents 1/2 FTE, and a teacher carrying a half load for the full year also represents 1/2 FTE.

FTE apportionments apply to both part-time and full-time staff performing multiple duties. In cases where a person performs multiple tasks, portions of that person's FTE are assigned according to the time spent at each duty. For example, a full-time person employed half the time as a teacher and half as an administrator would be counted as a 0.5 administrator FTE and a 0.5 teacher FTE.

EXHIBIT C

91	Gifted and Talented Education Expenditures	All but 31, 60, 80	10	6100-6400	50

GUARANTEED YIELD: In 1989-90 this component of the Foundation School Program guaranteed districts $18.25 per student, per penny of tax effort above $0.34. If a penny of local tax only generates half of the $18.25, the state provides the other half. Regardless of the portion of the $18.25 the local district is able to raise through a penny of tax effort, the state will contribute the rest, up to a total of $18.25. Districts able to generate $18.25 per student, per penny of effort on their own yield is also referred to as the second tier of the Foundation School Program.

LOCAL FUND ASSIGNMENT: The portion of the Foundation School Program allocation of a district, as determined by state formulas, that is assigned to the district to raise. Until 1989-90 districts were not required to raise this amount in order to receive state funds, but in fact most did. With the passage of Senate Bill 1019 raising the LFA became mandatory. While the tax rate for the LFA is fixed for all districts, the dollar amount of the LFA, or local share, varies with the district's property wealth. The poorer the district, the smaller the LFA and the greater the amount of state aid.

PEIMS: The *Public Education Information Management System* is the primary means through which the Texas Education Agency collects information on the staff and finances of all school districts in the state.

REFINED AVERAGE DAILY ATTENDANCE: Student attendance information is reported for eight weeks on the *Superintendent's Report of Pupil Attendance and Contact Hours, Table I.* For the 1989-90 school year, the eight weeks specified by the State Board of Education were:

AUXILIARY STAFF

Employment record, but no responsibility records reported.

The FTEs of Adult Basic Education staff or staff employed by special education cooperatives are not included in the information presented in this document. Adult Basic Education staff are identified as having either Adult Basic Education service codes or as being paid from fund code 31 or 80, meaning Adult Basic Education Fund and Trust and Agency Funds, respectively. Staff are identified as participants in a cooperative if their assigned campus number belongs in a district different from their employing district, or if they are reported with a campus number of 701. Only the portion of a person's total FTE amount associated with the campus in another district (or with the 701 record) was counted as cooperative.

October 2-6, 1989
October 9-13, 1989
October 16-20, 1989
October 23-27, 1989

February 19-23, 1990
February 26-March 2, 1990
March 5-9, 1990
March 12-16, 1990

Refined ADA is calculated by totalling attendance for the best, or highest, four weeks and dividing by four.

STAFF CATEGORIES DEFINED BY ROLE ID: Staff information from the fall 1989 PEIMS responsibility records was aggregated into categories using the reported role identifiers. Exhibit D lists this detail.

STATE BOARD OF EDUCATION - MAP OF DISTRICT BOUNDARIES: The map in Exhibit E illustrates the 15 SBOE district boundaries. Members of the SBOE are listed on page iii of this document.

TUITION TRANSFERS: Expenditures budgeted by districts for the cost of sending students to other districts for instruction. Because the transferring district does not count the enrollment of transferred students, including the expenditure would distort per pupil amounts. Therefore, in this publication amounts budgeted for tuition transfers have be excluded. Tuition transfers are defined as the total of objects 6231-Tuition Services, 6232-Transportation Services, and 6239-Other Services. However, if there are no expenditures for 6231, then 6232 and 6239 are not excluded.

COMPLIANCE STATEMENT

TITLE VI, CIVIL RIGHTS ACT OF 1964; THE MODIFIED COURT ORDER, CIVIL ACTION 5281, FEDERAL DISTRICT COURT, EASTERN DISTRICT OF TEXAS, TYLER DIVISION

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

(1) acceptance policies on student transfers from other school districts;

(2) operation of school bus routes or runs on a non-segregated basis;

(3) nondiscrimination in extracurricular activities and the use of school facilities;

(4) nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;

(5) enrollment and assignment of students without discrimination on the basis of race, color, or national origin;

(6) nondiscriminatory practices relating to the use of a student's first language; and

(7) evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

TITLE VII, CIVIL RIGHTS ACT OF 1964; EXECUTIVE ORDERS 11246 AND 11375; TITLE IX, 1973 EDUCATION AMENDMENTS; REHABILITATION ACT OF 1973 AS AMENDED; 1974 AMENDMENTS TO THE WAGE-HOUR LAW EXPANDING THE AGE DISCRIMINATION IN EMPLOYMENT ACT OF 1967; AND VIETNAM ERA VETERANS READJUSTMENT ASSISTANCE ACT OF 1972 AS AMENDED IN 1974.

It is the policy of the Texas Education Agency to comply fully with the nondiscrimination provisions of all federal and state laws and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any programs or activities which it operates on the grounds of race, religion, color, national origin, sex, handicap, age, or veteran status (except where age, sex, or handicap constitute a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency makes positive efforts to employ and advance in employment all protected groups.
